

TRADE IN PROGRAM

AG-372 Receiver for AG-392 Receiver

For a limited time, you can trade in an AG-372 GNSS receiver for an AG-392 GNSS receiver. AG-372 GNSS receivers at any accuracy level are eligible to trade in and order one of the two SP P/Ns for an AG-392 GNSS receiver.

Other Trimble legacy receivers from CNH machines (for example: AgGPS 252 or AgGPS 262) may also be eligible for this trade-in program. Customers can get up to \$4,500 off with this trade program.

Go to this website and completing the trade form:

This program ends June 30, 2024.

Elite, simple-to-use precision guidance

With the Trimble AG-392 receiver, you can put the full power of our ProPoint™ technology and industry-leading CenterPoint® RTX correction service to work, delivering:

75% faster start time

With quicker signal convergence, you can get right to work and spend less time in the field waiting to get started.

Improved performance

With Trimble's robust, reliable GNSS network, you'll experience fewer position jumps and drop-outs so you can keep rolling regardless of tree lines, buildings or harsh environments.

Hassle-free precision

With no additional hardware, services or support required, CenterPoint RTX is the easiest way for farmers to achieve centimeter-level (sub-inch) accuracy.
