Release Notice

This is the February 2015 release (Revision C) of the TMX-2050 display documentation. It applies to version 2 of the display software.

Legal Notices

The following limited warranties give you specific legal rights. You may have others, which vary from state/jurisdiction to state/jurisdiction.

Product Limited Warranty

Trimble warrants that this Trimble product and its internal components (the "Product") shall be free from defects in materials and workmanship and will substantially conform to Trimble's applicable published specifications for the Product for a period of one (1) year, starting from the earlier of (i) the date of installation, or (ii) six (6) months from the date of original Product shipment from Trimble. This warranty applies only to the Product if installed by Trimble or a dealer authorized by Trimble to perform Product installation services.

Warranty Remedies

Trimble's sole liability and your exclusive remedy under the warranties set forth above shall be, at Trimble's option, to repair or replace any Product that fails to conform to such warranty ("Nonconforming Product"), and/or issue a cash refund up to the purchase price paid by you for any such Nonconforming Product, excluding costs of installation, upon your return of the Nonconforming Product to Trimble in accordance with Trimble's product return procedures than in effect. Such remedy may include reimbursement of the cost of repairs for damage to third-party equipment onto which the Product is installed, if such damage is found to be directly caused by the Product as reasonably determined by Trimble following a root cause analysis.

Warranty Exclusions and Disclaimer

These warranties shall be applied only in the event and to the extent that (a) the Products and Software are properly and correctly installed, configured, interfaced, maintained, stored, and operated in accordance with Trimble's relevant operator's manual and specifications, and; (b) the Products and Software are not modified or misused. The preceding warranties shall not apply to, and Trimble shall not be responsible for defects or performance problems resulting from (i) the combination or utilization of the Product or Software with hardware or software products, information, data, systems, interfaces or devices not made, supplied or specified by Trimble; (ii) the operation of the Product or Software under any specification other than, or in addition to, Trimble's standard specifications for its products; (iii) the unauthorized, installation, modification, or use of the Product or Software; (iv) damage caused by accident, lightning or other electrical discharge, fresh or salt water immersion or spray (outside of Product specifications); or (v) normal

wear and tear on consumable parts (e.g., batteries). Trimble does not warrant or guarantee the results obtained through the use of the Product or that software components will operate error free.

THE WARRANTIES ABOVE STATE TRIMBLE'S ENTIRE LIABILITY, AND YOUR EXCLUSIVE REMEDIES, RELATING TO THE PRODUCTS AND SOFTWARE. EXCEPT AS OTHERWISE EXPRESSLY PROVIDED HEREIN, THE PRODUCTS, SOFTWARE, AND ACCOMPANYING DOCUMENTATION AND MATERIALS ARE PROVIDED "AS IS" AND WITHOUT EXPRESS OR IMPLIED WARRANTY OF ANY KIND BY EITHER TRIMBLE NAVIGATION LIMITED OR ANYONE WHO HAS BEEN INVOLVED IN ITS CREATION, PRODUCTION, INSTALLATION, OR DISTRIBUTION INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, TITLE, AND NON-INFRINGEMENT. THE STATED EXPRESS WARRANTIES ARE IN LIEU OF ALL OBLIGATIONS OR LIABILITIES ON THE PART OF TRIMBLE ARISING OUT OF, OR IN CONNECTION WITH, ANY PRODUCTS OR SOFTWARE. BECAUSE SOME STATES AND JURISDICTIONS DO NOT ALLOW LIMITATIONS ON DURATION OR THE EXCLUSION OF AN IMPLIED WARRANTY, THE ABOVE LIMITATION MAY NOT APPLY OR FULLY APPLY TO YOU.

NOTICE REGARDING PRODUCTS EQUIPPED WITH TECHNOLOGY CAPABLE OF TRACKING SATELLITE SIGNALS FROM SATELLITE BASED AUGMENTATION SYSTEMS (SBAS) (WAAS/EGNOS, AND MSAS), OMNISTAR, GPS, MODERNIZED GPS OR GLONASS SATELLITES, OR FROM IALA BEACON SOURCES: TRIMBLE IS NOT RESPONSIBLE FOR THE OPERATION OR FAILURE OF OPERATION OF ANY SATELLITE BASED POSITIONING SYSTEM OR THE AVAILABILITY OF ANY SATELLITE BASED POSITIONING SIGNALS.

Limitation or Liability

TRIMBLE'S ENTIRE LIABILITY UNDER ANY PROVISION HEREIN SHALL BE LIMITED TO THE AMOUNT PAID BY YOU FOR THE PRODUCT OR SOFTWARE LICENSE. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL TRIMBLE OR ITS SUPPLIERS BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES WHATSOEVER UNDER ANY CIRCUMSTANCE OR LEGAL THEORY RELATING IN ANY WAY TO THE PRODUCTS, SOFTWARE AND ACCOMPANYING DOCUMENTATION AND MATERIALS, (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION, OR ANY OTHER PECUNIARY LOSS), REGARDLESS WHETHER TRIMBLE HAS BEEN ADVISED OF THE POSSIBILITY OF ANY SUCH LOSS AND REGARDLESS OF THE COURSE OF DEALING WHICH DEVELOPS OR HAS DEVELOPED BETWEEN YOU AND TRIMBLE. BECAUSE SOME STATES AND JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES, THE ABOVE LIMITATION MAY NOT APPLY OR FULLY APPLY TO YOU. **PLEASE NOTE: THE ABOVE TRIMBLE LIMITED WARRANTY PROVISIONS WILL NOT APPLY TO PRODUCTS PURCHASED IN THOSE JURISDICTIONS (E.G., MEMBER STATES OF THE EUROPEAN ECONOMIC AREA) IN WHICH PRODUCT WARRANTIES ARE THE RESPONSIBILITY OF THE LOCAL DEALER FROM WHOM THE PRODUCTS ARE ACQUIRED. IN SUCH A CASE, PLEASE CONTACT YOUR TRIMBLE DEALER FOR APPLICABLE WARRANTY INFORMATION.**

Official Language

THE OFFICIAL LANGUAGE OF THESE TERMS AND CONDITIONS IS ENGLISH. IN THE EVENT OF A CONFLICT BETWEEN ENGLISH AND OTHER LANGUAGE VERSIONS, THE ENGLISH LANGUAGE SHALL CONTROL.

Registration

To receive information regarding updates and new products, please contact your local dealer or visit the Trimble website at www.trimble.com/register. Upon registration you may select the newsletter, upgrade or new product information you desire.

Notices

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is

likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense. Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. TRIMBLE is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Responsible Party:
Trimble Navigation
935 Stewart Drive
Sunnyvale CA 94085
Telephone: 1-408 481 8000

Canada

This Class A digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

This apparatus complies with Canadian RSS-GEN. Cet appareil est conforme à la norme CNR-GEN du Canada.

Europe

This product has been tested and found to comply with the requirements for a Class A device pursuant to European Council Directive 2006/42/EC and 1999/5/EC, thereby satisfying the requirements for CE Marking and sale within the European Economic Area (EEA). Contains a radio module. These requirements are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential or commercial environment.

Australia and New Zealand

This product conforms with the regulatory requirements of the Australian Communications and Media Authority (ACMA) EMC framework, thus satisfying the requirements for C-Tick Marking and sale within Australia and New Zealand.

Waste Electrical and Electronic Equipment (WEEE)

For product recycling instructions and more information, please go to

http://www.trimble.com/Corporate/Environmental_Comppliance.aspx

Recycling in Europe: To recycle Trimble WEEE (Waste Electrical and Electronic Equipment, products that run on electrical power.), Call +31 497 53 24 30, and ask for the "WEEE Associate". Or, mail a request for recycling instructions to:
Trimble Europe BV
c/o Menlo Worldwide Logistics
Meerheide 45
5521 DZ Eersel, NL

Safety Information

Always follow the instructions that accompany a Warning or Caution. The information it provides is intended to minimize the risk of personal injury and/or damage to property. In particular, observe safety instructions that are presented in the following format:

WARNING – This alert warns of a potential hazard which, if not avoided, could result in severe injury or even death.

CAUTION – This alert warns of a potential hazard or unsafe practice which, if not avoided, could result in injury or property damage or irretrievable data loss.

Note – *An absence of specific alerts does not mean that there are no safety risks involved.*

Antennas

CAUTION – Wireless, cellular, radio and GNSS signals can interfere with each other. For best performance, mount antennas at least 1 meter away from each other.

Cabling

CAUTION – Connecting the Port Replicator of the NavController cable to the P4 or P12 connector of the NavController harness will result in damage to the equipment, and will void the warranty.

DCM-300 modem

CAUTION – Do not mount the DCM-300 modem in direct sunlight or in areas of high heat. This will cause degraded performance.

Installation

CAUTION – Connecting the Port Replicator of the NavController cable to the P4 or P12 connector of the NavController harness will result in damage to the equipment, and will void the warranty.

CAUTION – Make sure the vehicle power is off when you are connecting system components.

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For

more information, see [Master disconnect, page 30](#).

CAUTION – Do not attempt to power the display without the TM-200 Module.

Touch screen

CAUTION – Do not press on the screen with a sharp item, such as a pencil. You may damage the surface of the screen.

TMX-2050 display

Technical	
Power	27 volts, 3.5 amps (supplied by the TM-200 Module)
	 CAUTION – Do not attempt to power the display without the TM-200 Module.
Processor	1 GHz quad core
Storage	Primary embedded memory - 32 GByte
Mechanical	
Dimensions	312 mm x 214 mm x 45 mm (plus connectors) (1 ft 8/32 in x 8 1/4 in x 1 49/64 in)
Weight	2.5 kg (5.5 lb)
Mount	4 M6 screws on 75 mm centers (3 inch). VESA MIS-D 75.
Housing	
Material	Magnesium
Environmental Rating	IP55
Temperature	
Operation	0 °C to 65 °C (32 °F to 149 °F)
Storage	-40 °C to 85 °C (-40 °F to 185 °F)
LCD display	
Size	307 mm (1 ft 3/32 in)

LCD display

Touch screen	Capacitive touch
Resolution	1280 x 800

Front-facing camera

Type	Low light level, color
Resolution	1.3 M pixels

Connections

USB	USB side (side of display), USB rear (back of display)
Ethernet	RJ45 connector. Power input for TMX-2050 display only.

TM-200 Module

Technical	
Power	9 to 16 volts, 25 amps
Storage	64 megabytes (Flash)

Mechanical	
Dimensions	209 mm x 184 mm x 57 mm (plus connectors) (8 15/64 in x 7 1/4 in x 2 1/4 in)
Weight	2.54 kg (5.6 lb)
Mount	4 M6 (or #12) screws on 165 mm centers (6.5 inch).

Housing	
Material	Aluminum
Environmental Rating	IP55

Temperature	
Operation	-40 °C to 65 °C (-40 °F to 149 °F)
Storage	-40 °C to 85 °C (-40 °F to 185 °F)

GNSS	
Internal 220 channel GNSS receiver, L1 / L2 / GLONASS capable	

Connections	
Power (14-pin Ampseal connector)	Power input CAN 2x Digital In / Out 12 volt power output (non-regulated, fused) Ignition Sense

Connections

I / O (12-pin DEUTSCH connector)	CAN RS232 Digital In Digital Out Video In (640 x 480 resolution) NTSC & PAL 12 volt power output
Display Ethernet (White 8-pin Ampseal connector)	Display power 28 volt, 2 amp output Display Ethernet Communications Video Out Ignition Sense
Secondary Ethernet (Black 8-pin Ampseal connector)	Ethernet Communications 12 volt power output Video In
GPS / GNSS (TNC connector)	GPS / GNSS antenna 5 volt

EXP-100 Port Expander

Technical

Power	Input: 12VDC, 1.5A Output: 12VDC, 0.75A
-------	--

Mechanical

Dimensions	98 mm x 64 mm x 29 mm (3 7/8 in x 2 17/32 in x 1 1/8 in)
Weight	0.40 kg (0.89 lb)

Housing

Material	Thermoplastic polyamide
Environmental Rating	IP67

Temperature

Operation	-30 °C to 80 °C (-22 °F to 176 °F)
Storage	-40 °C to 85 °C (-40 °F to 185 °F)

AG-815

Technical		
Power	Via TM-200 module	
Mechanical		
Dimensions	144 mm x 81 mm x 52.5 mm (plus connectors) (5 43/64 in x 3 3/16 in x 2 1/16in)	
Weight	0.55 kg (1.22 lb)	
Mount	The AG-815 module attaches directly to the TM-200 module with four M3 x 16 mm (5/8 in) screws	
Housing		
Material	Aluminum	
Environmental rating	IP55	
Temperature		
Operation	-40 °C to 65 °C (-40 °F to 149 °F)	
Storage	-40 °C to 85 °C (-40 °F to 185 °F)	
GNSS		
Internal 220 channel GNSS receiver, L1/L2/GLONASS capable		
Radio options	450 MHz radio	900 MHz radio
Range	13 km (8 miles); varies with terrain and operating conditions	13 km (8 miles); varies with terrain and operating conditions
Frequency range	430 to 450 MHz, 450 to 470 MHz (region-dependent)	902 to 928 MHz
Networks	20 user-selectable networks	40 user-selectable networks
Wireless data rates	128 Kbps	128 Kbps
Modes	Rover (receive only)	Rover (receive only)

Data sheet

Connections

Radio (TNC connector) Radio antenna, if installed

GNSS (TNC connector) GNSS receiver, if installed

Introduction

In this chapter:

TMX-2050 display overview	18
Compatibility	18

The Trimble® TMX-2050™ display is an in-cab touch screen display that provides affordable guidance, steering and precision agriculture functionality.

TMX-2050 display overview

The TMX-2050 display is a ruggedized display consisting of a 30 cm (12") touch-sensitive, color LCD screen.

Compatibility

TMX-2050 display is compatible with the following automated guidance and steering:

- Trimble Autopilot™ automated steering system
- Trimble EZ-Steer® assisted steering system
- Trimble EZ-Pilot® steering system

Components

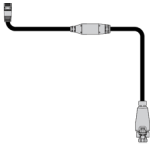

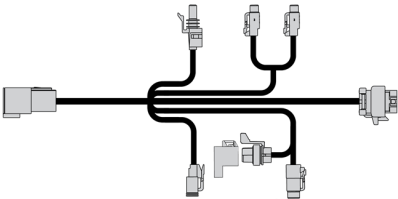

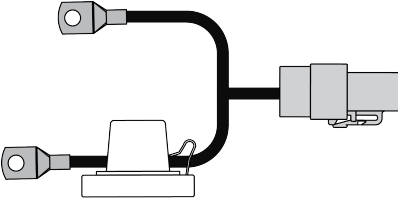

In this chapter:

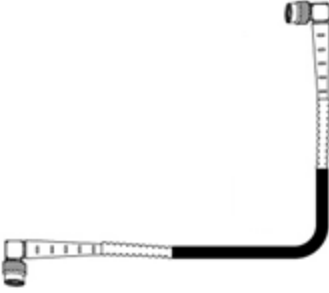

TMX-2050 display system components ..	20
TMX-2050 display—rear view	23
TM-200 Module	25
TM-200 Module, power and I/O cable ...	26
Making correct connections	26

This chapter shows the components of the TMX-2050 display.

Use Trimble cables only. Trimble cables use specific wire gauges not found in some off-the-shelf RJ45/CAT 6 cables.

TMX-2050 display system components

Item	Description	Part Number
	TMX-2050 display, rear view	96700-00
	TM-200 Module to display cable	93843
	TM-200 Module	95060-00
	TM-200 Module power and I/O cable	92676
	TM-200 Module battery cable	92905

Item	Description	Part Number
	AG-25 GNSS antenna to TM-200 Module cable	50449
	AG-25 GNSS antenna	77038-01
	AG-815, with integrated radio and/or GNSS receiver	
Integrated radio only	430 - 450 MHz 450 - 470 MHz 900 MHz	95090-44 95090-46 95090-90
GNSS receiver only		95092-xx
Integrated radio + GNSS receiver combo	430 - 450 MHz 450 - 470 MHz 900 MHz	95094-xx 95095-xx 95093-xx

Item	Description	Part Number
	Radio antenna cable	72122
	Radio antenna 430 - 450 MHz 450 - 470 MHz SiteNet™ 900	24253-44 24253-46 22882-10
	EXP-100 Port Expander ASSEMBLY, EXP-100 Port Expander Adapter TM-200 to Ethernet Adapter DCM-300 (94267) to Ethernet EXP-100, Patch Cable 1 Meter	101895-00 100904 100906 102730

TMX-2050 display—rear view

Item	Name	Explanation
1	Power button	Powers the TMX-2050 display on or off
2	Labels with part number and serial number	N/A
3	Port: DVI	For future capability
4	Jack: TM-200 Module (RJ45)	Socket for connecting to the TM-200 Module
		
5	Cable brackets	Holds Ethernet cables to prevent cable strain
6	Interior bolts	Location for mounting Field-IQ system switch box
7	Jack: CAN (RJ11)	For future capability
8	Port: USB (rear) with cover	Socket for USB drive to transferring data to and from the TMX-2050 display

Item	Name	Explanation
9	Speakers	For use if you have sound activated on the TMX-2050 display.
10	Port: USB (side) with cover	Socket for USB drive to transferring data to and from the TMX-2050 display.
11	Interior bolts in mounting plateplate	Receives screws for Zirkona display mount
12	Ambient light sensor	Senses lower ambient light and activates the backlight on the display.

CAUTION – Do not press on the screen with a sharp item, such as a pencil. You may damage the surface of the screen.

See [TMX-2050 display mounting, page 29](#) and [Power connection, page 31](#).

TM-200 Module

The TM-200 Module has multiple power and input/output connections, with only one connection to the TMX-2050 display. This enables you to quickly detach the display without removing all other connections.

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

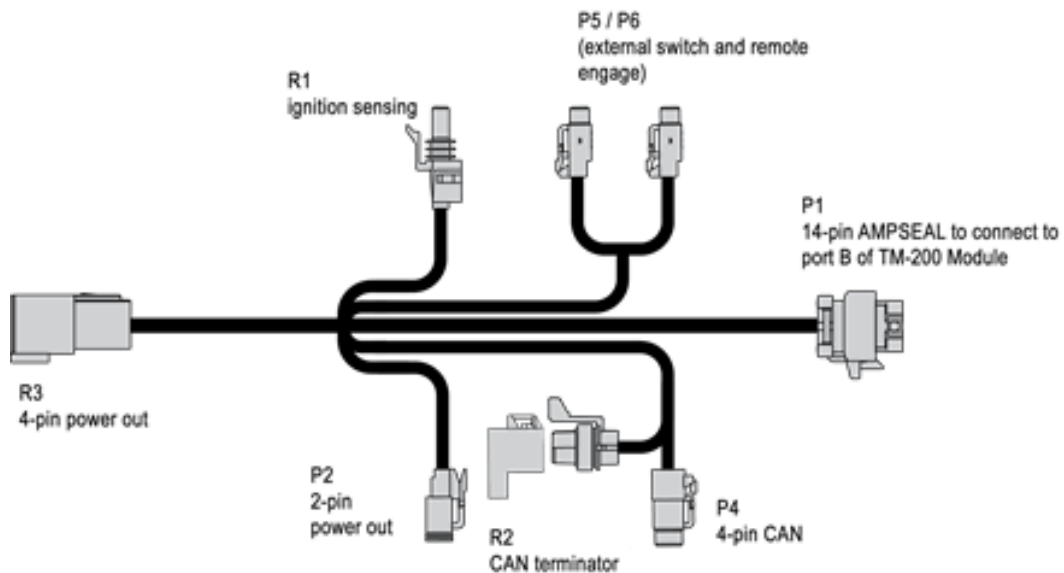

CAUTION – Do not attempt to power the display without the TM-200 Module.

TM-200 Module, power and I/O cable

The power and input/output cable provides power as well as enabling a variety of equipment configurations.

Making correct connections

Keep the following guidelines in mind for configuring cables with multiple connectors to single ports.

CAUTION – Connecting the Port Replicator of the NavController cable to the P4 or P12 connector of the NavController harness will result in damage to the equipment, and will void the warranty.

- The Field-IQ™ crop input control and Boom Height Control systems and the Yield Monitoring system require a CAN connection.
- The EZ-Steer and EZ-Pilot assisted steering systems require their own dedicated CAN ports.
- The Autopilot automated steering system must be connected to port A on the TM-200 Module. See [Autopilot system, page 52](#).
- The DCM-300 modem can only be connected to the Ethernet expansion port on the TM-200 Module.

Installation

In this chapter:

Installation overview	28
TMX-2050 display mounting	29
Master disconnect	30
Power connection	31
Regular after-market installation	31
Existing OEM harness installation	33
TM-200 Module connection	35
EXP-100 connection	36

The TMX-2050 display is supported by the Zirkona mount, which can be attached to a rail in the cab. The power connection depends on the vehicle and system configuration.

Use Trimble cables only. Trimble cables use specific wire gauges not found in some off-the-shelf RJ45/CAT 6 cables.

Installation overview

To install the TMX-2050 display:

1. Mount the display. See [TMX-2050 display mounting, page 29](#).
2. Complete the appropriate power connections. See [Power connection, page 31](#).
3. If you are using the AG-815, join the AG-815 to the TM-200 Module. See [AG-815, page 46](#).
4. Connect the display to the TM-200 Module. See [TM-200 Module, page 25](#).
5. Connect the AG-25 GNSS antenna(s) and other hardware required for corrections. See:
 - [Hardware for corrections, page 40](#)
 - [AG-25 GNSS antenna, page 41](#)
 - [AG-25 GNSS antenna mast-mounted, page 45](#)
 - [Dual AG-25 GNSS antenna, page 43](#)
 - [DCM-300 modem, page 49](#)
6. Connect the EXP-100 if required. See [EXP-100 connection, page 36](#).

TMX-2050 display mounting

Use the mounting hardware supplied in the display kit to mount the display in the vehicle cab.

CAUTION – Make sure the vehicle power is off when you are connecting system components.

Before completing installation steps, select a position in the cab where the bar mount can be attached to a rail. Hold the display in the selected location and make sure that it is:

- Easy to see, but does not block the driver's view
- Within the driver's reach so that the USB drive is easy to remove and replace
- Does not interfere with the driver getting in or out of the cab, or any other activities

1. Use the provided bolts to attach the bar mount to a rail in the cab.

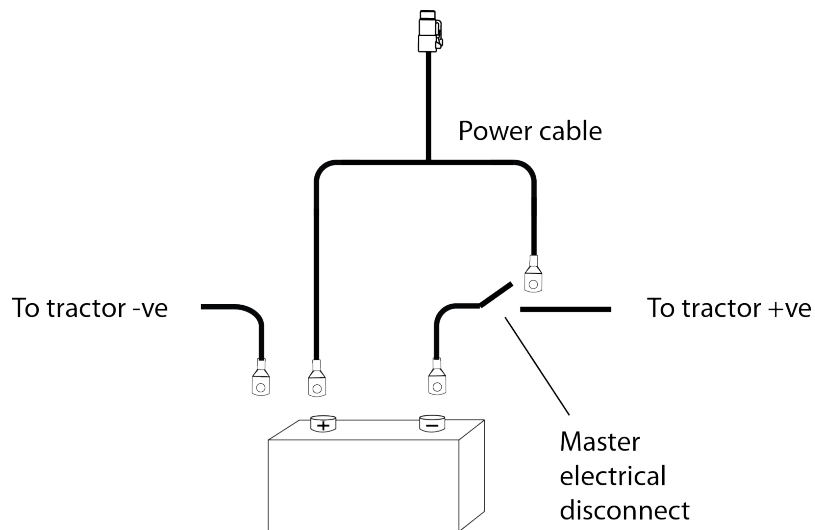

2. Use the supplied screws to firmly attach the mounting plate to the back of the TMX-2050 display. See [TMX-2050 display—rear view, page 23](#).
3. Turn the tightening arm to loosen the Zirkona mount.
4. Adjust the TMX-2050 display until it is positioned where you want it. Turn the tightening arm the other direction to tighten the Zirkona mount.

Master disconnect

1. Before proceeding further with the installation, make sure you know whether the vehicle has a master disconnect.
2. If the vehicle has a master electrical disconnect, make sure that the power cable ground connections are **not** directly attached to the battery terminal, shown as the negative pole in the graphic below.
3. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery but still gets disconnected when the master disconnect is turned off.

Note – If a Master disconnect is installed on either the positive or ground path of the battery, the ring terminals of the power cable should always be connected behind the master disconnect device.

CAUTION – Make sure the vehicle power is off when you are connecting system components.

Power connection

The correct power cabling depends on the configuration of your vehicle: with or without an existing OEM harness.

Regular after-market installation

The following configuration is a regular power connection for the TMX-2050 display for vehicles that do not have an existing OEM harness.

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

CAUTION – Make sure the vehicle power is off when you are connecting system components.

Part Number	Description
92676	TM-200 Module power and I/O cable connected to port B
92905	TM-200 Module battery cable
93843	TM-200 Module to display cable
95060-00	TM-200 Module
96700-00	TMX-2050 display

Existing OEM harness installation

For vehicles that have an existing OEM harness, use the configuration as shown in the following graphic.

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

CAUTION – Make sure the vehicle power is off when you are connecting system components.

95060-00	TM-200 Module
95918	Power adapter cable
96700-00	TMX-2050 display

TM-200 Module connection

The TM-200 Module connects to the antenna, auto-steering and other systems, such as the Field-IQ system's Rate and Section Control. Before installation, make sure the TM-200 Module is out of the way but accessible, and close enough to connect to the display with the supplied display cable.

CAUTION – Make sure the vehicle power is off when you are connecting system components.

1. Make sure you have connected the AG-815 to the TM-200 Module. See [AG-815](#), page 46.
2. Use the display cable to connect the TM-200 Module to the TMX-2050 display.

Connector icons

On TM-200 Module:

On display:

Ensure the cable is fastened into the cable clip next to the port on the rear of the display.

This prevents the cable from being removed from the port and reduce stress on the cable.

CAUTION – Do not attempt to power the display without the TM-200 Module.

3. To connect the AG-25 GNSS antenna to the TM-200 Module, see [AG-25 GNSS antenna](#), page 41.
4. Insert the TM-200 Module power and I/O cable into Port B of the TM-200 Module. Port icon:

B 12V , 25A

EXP-100 connection

The EXP-100 port expander for the TMX-2050 display provides additional CAN, serial and input/output connections. The EXP-100 port expander connects to the TM-200 module, adding a 12-pin connector that allows for additional serial, CAN, and I/O connections. The EXP-100 plugs into the black 8-pin AMPSEAL connector on the end of the TM-200 module and communicates via Ethernet.

Each EXP-100 can be used to configure one serial feature and two I/O features. You can use up to three EXP-100 Port Expanders if your configuration requires multiple serial features.

Serial Features:

- External receiver
- External radio
- NMEA output
- Remote output
- Serial data input
- Serial rate control
- TrueTracker™
- Yield Monitoring, serial

I/O Features:

- Autopilot 3rd Solenoid/Isolation Valve Output
- Logging switch input
- Remote output

Note – The EXP-100 kit part number is 101990-00. If your configuration uses a DCM-300 modem, you need kit 101990-01.

1. Plug the power connector from the EXP-100 into the P2 connector on the 92676 cable coming from the TM-200 Module.

If you need more than one power out from the 92676, use the optional Multi Power Accessory Cable 94645.

2. Connect the 1-Meter Patch cable (102730) to the EXP-100 non-capped connector of the Ethernet 1 port.

3. Connect the TM-200 Adaptor cable (100904) to the other end of the 1-Meter Patch cable (102730) that you just connected to the EXP-100, Ethernet 1 port.

4. Plug the TM-200 Adaptor cable (100904) into the Black AMPSEAL connector on the end of the TM-200 Module.
5. If you are using a DCM-300 modem or Multiple EXP-100, remove the end cap from the Ethernet 2 port on the EXP-100.
6. Connect the 1-Meter Patch cable (102730) to the Ethernet 2 port on the EXP-100.

7. Connect the other end of the 1-Meter Patch cable (102730) to either the Secondary EXP-100 or the DCM-300 Adaptor (100906).

Connectivity

In this chapter:

Hardware for corrections	40
AG-25 GNSS antenna	41
Dual AG-25 GNSS antenna	43
Common	43
FieldLevel II	44
AG-25 GNSS antenna mast-mounted	45
AG-815	46
AG-815 with integrated radio	47
DCM-300 modem	49

The type of correction services and data transfer services you want determine the configuration for connectivity hardware.

Use Trimble cables only. Trimble cables use specific wire gauges not found in some off-the-shelf RJ45/CAT 6 cables.

Hardware for corrections

The type of corrections you will be using determines your configuration.

Note – The AG-25 GNSS antenna is required for all correction services.

Hardware	Used for Correction Service:
AG-25 GNSS antenna, page 41	<ul style="list-style-type: none"> • SBAS* • OmniSTAR® HP/G2 • RangePoint™ RTX™ • Centerpoint™ RTX
AG-815, page 46 with the integrated radio installed	<ul style="list-style-type: none"> • RTK**
AG-25 GNSS antenna, page 41	
DCM-300 modem, page 49	<ul style="list-style-type: none"> • CenterPoint VRS™ • VRSNow™
AG-25 GNSS antenna, page 41	<p>Note – Also provides telematics and enables you to wirelessly transfer data from your vehicle.</p>

*SBAS (Satellite Based Augmentation Systems) includes:

- WAAS (Wide Area Augmentation System), available in the USA
- EGNOS (European Geostationary Navigation Overlay Service), available in Europe
- MSAS (MTSAT Satellite-based Augmentation System), available in Japan

**Traditional RTK uses radio communications to provide corrections. When using RTK with radio communications, you need access to a base station located within a eight-mile radius (approximately) from your farm. An RTK base station sends corrections via a radio transmitter to a mobile receiver attached to your vehicle.

AG-25 GNSS antenna

Note – The AG-25 GNSS antenna is required for all correction services.

The GNSS antenna is required for the GNSS receiver in the TM-200 Module to receive GPS / GNSS corrections. The AG-25 GNSS antenna connects to the antenna connector  1 on the TM-200 Module.

CAUTION – Wireless, cellular, radio and GNSS signals can interfere with each other. For best performance, mount antennas at least 1 meter away from each other.

Part Number	Description
50449	AG-25 GNSS antenna cable
77038-01	AG-25 GNSS antenna
95060-00	TM-200 Module

CAUTION – Make sure the vehicle power is off when you are connecting system components.

CAUTION – Wireless, cellular, radio and GNSS signals can interfere with each other. For best performance, mount antennas at least 1 meter away from each other.

The AG-25 GNSS antenna has integrated magnets for easy installation. To attach the antenna to a non-metal surface, use the mounting plate.

Note – If you are using the AG-25 GNSS antenna with a steering system, see the installation instructions for the steering system to determine the proper location for mounting the antenna.

1. Connect the antenna cable to the AG-25 GNSS antenna.

2. Place the antenna on the roof of the vehicle, at the front and centered from left to right.
3. On the mounting plate, remove the protective covers from the adhesive strips.
4. Attach the mounting plate to the vehicle roof with the adhesive strips.
5. Place the antenna on top of the mounting plate.
6. Route the other end of the antenna cable into the cab.
7. Connect the GNSS antenna cable to the TM-200 Module. Connector icon: . Also see [TM-200 Module connection, page 35](#).

Note – To minimize any interference to the GNSS signal, make sure that any other antenna (including a radio antenna) is at least 1 m (3 ft) from the AG-25 GNSS antenna.

 **CAUTION** – The GNSS antenna may experience interference if you operate the vehicle within 100 m (300 ft) of any power line, radar dish, or cell phone tower.

For mounting the AG-25 antenna on a mast, see [AG-25 GNSS antenna mast-mounted, page 45](#).

Dual AG-25 GNSS antenna

Note – The AG-25 GNSS antenna is required for all correction services.

The first AG-25 receiver connects to the antenna connector  1, on the TM-200 Module.

The second AG-25 GNSS antenna connects to the GNSS receiver's connector on the AG-815.

CAUTION – Wireless, cellular, radio and GNSS signals can interfere with each other. For best performance, mount antennas at least 1 meter away from each other.

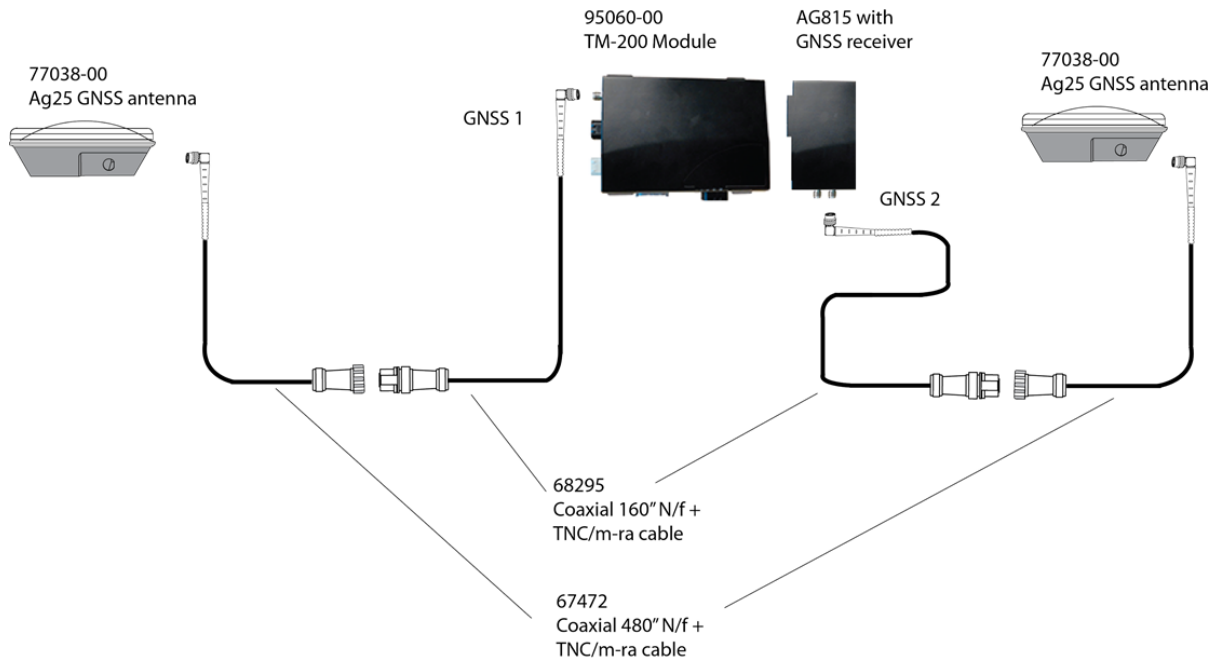

Common

Part Number	Description
50449	AG-25 GNSS antenna cable
77038-00	AG-25 GNSS antenna
95060-00	TM-200 Module
95092-xx, 95093-xx, 95907-xx, or 95095-xx	AG-815 with GNSS receiver

FieldLevel II

This configuration is applicable to using scrapers. Also see [Water Management, page 117](#).

Part Number	Description
67472	Cable, Coaxial 480" - N/m + TNC/m-ra
68295	Cable, Coaxial 160" - N/f + TNC/m-ra
77038-00	AG-25 GNSS antenna
95060-00	TM-200 Module
95092-xx, 95093-xx, 95907-xx, or 95095-xx	AG-815 with GNSS receiver

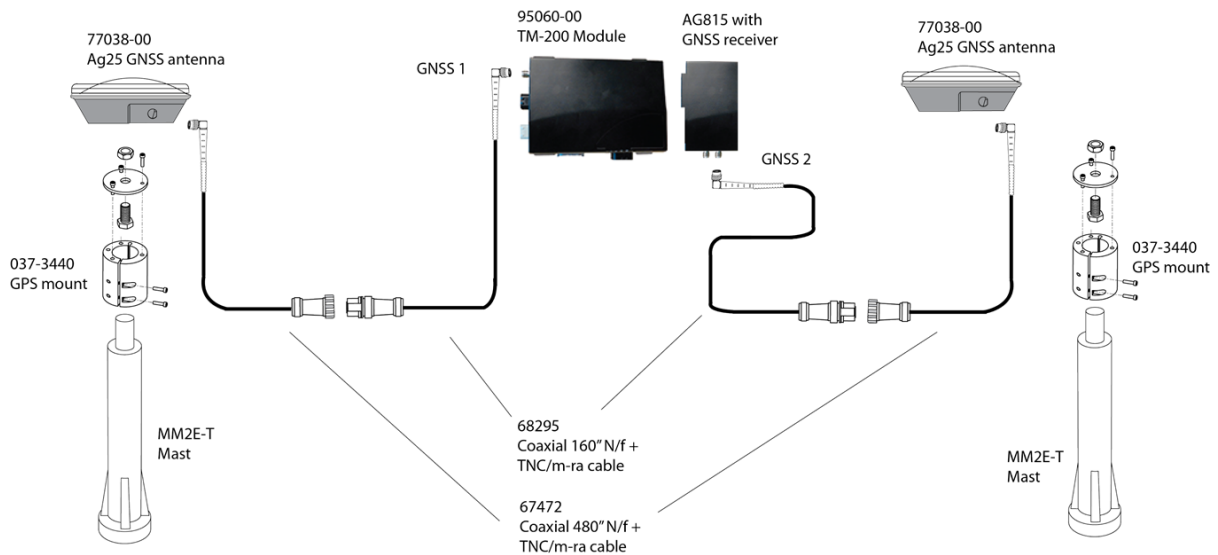

AG-25 GNSS antenna mast-mounted

Note – The AG-25 GNSS antenna is required for all correction services.

The primary AG-25 GNSS antenna connects to the antenna connector  1 on the TM-200 Module.

CAUTION – Wireless, cellular, radio and GNSS signals can interfere with each other. For best performance, mount antennas at least 1 meter away from each other.

Part Number	Description
037-3440	GPS mount
67472	Coaxial 480 TNC/m-ra cable
68295	Coaxial 160 TNC/m-ra cable
77038-00	AG-25 GNSS antenna
95060-00	TM-200 Module
95092-xx, 95093-xx, 95907-xx, or 95095-xx	AG-815 with GNSS receiver
MM2E-T	Mast

AG-815

The AG-815 with:

- An integrated radio is required for using RTK connections
- A GNSS receiver is required to use two GNSS antennas.

1. Use a T10 Torx screwdriver to remove the screws (1) and face plate from the TM-200 Module.

2. Insert the AG-815 blade connector (2) into the radio expansion slot of the TM-200 Module.
3. Use the long screws provided with the AG-815 to fasten the it to the TM-200 Module. The

following image shows the AG-815 attached to the TM-200 Module.

AG-815 with integrated radio

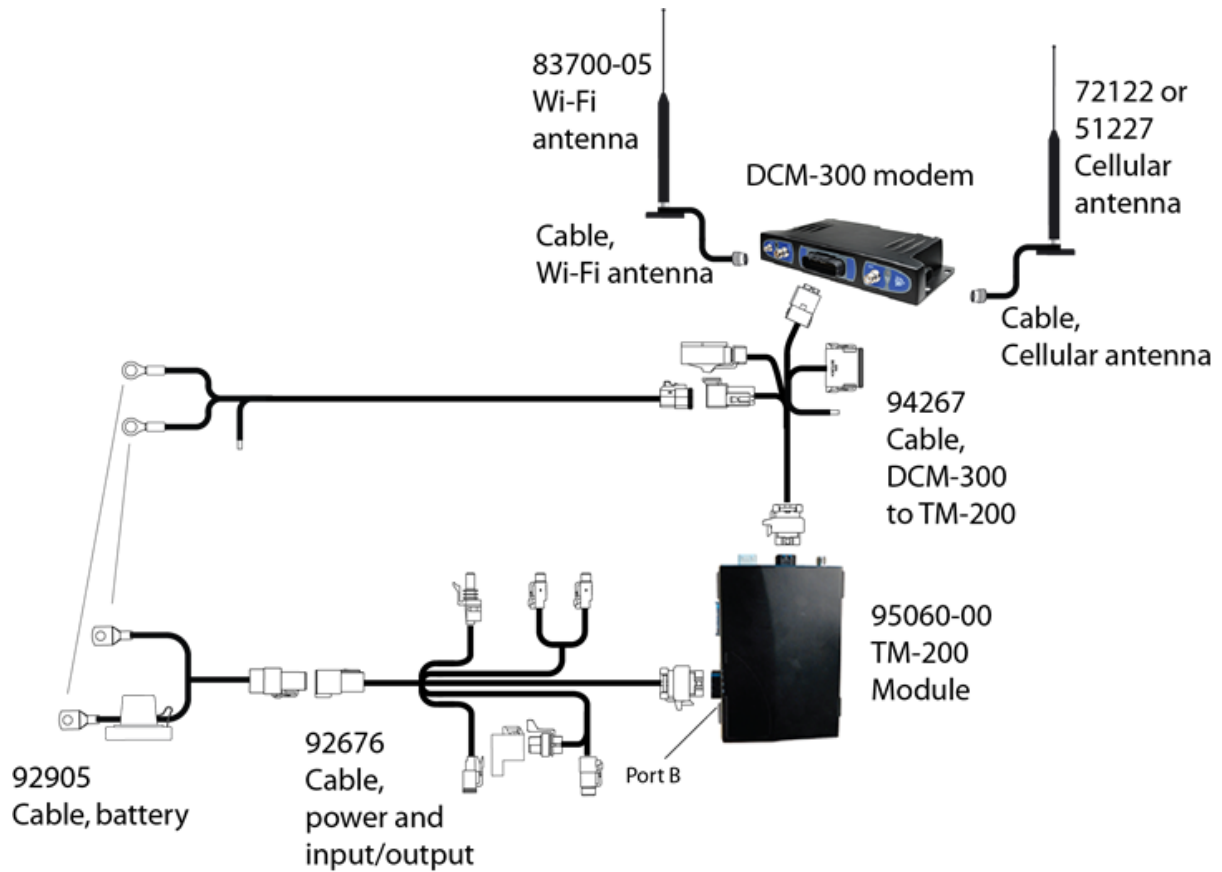

CAUTION – Wireless, cellular, radio and GNSS signals can interfere with each other. For best performance, mount antennas at least 1 meter away from each other.

Part Number	Description
	Radio antenna
24253-44	430 - 450 MHz
24253-46	450 - 470 MHz
22882-10	SiteNet™ 900

Part Number	Description
72122	Radio antenna cable
95060-00	TM-200 Module
95090-xx, 95093-xx, 95094-xx, or 95095-xx	AG-815 with integrated radio

DCM-300 modem

Part Number	Description
51227	Cellular antenna
72122	Cellular antenna
77038-00	AG-25 GNSS antenna
83700-05	Wi-Fi antenna
92676	Cable, TM-200 Module power and input/output
95060-00	TM-200 Module
95092-xx, 95093-xx, 95907-xx, or 95095-xx	AG-815 with GNSS receiver

When you install the modem, use the hardware supplied with the DCM-300 modem for installation.

CAUTION – Make sure the vehicle power is off when you are connecting system components.

CAUTION – Do not mount the DCM-300 modem in direct sunlight or in areas of high heat. This will cause degraded performance.

1. Mount the modem inside the cab of the vehicle, in a shaded area with good ventilation. Mount the cellular antenna on the outside of the vehicle. If you are using Vehicle Sync or Office Sync to exchange data remotely, mount the WiFi antenna on the outside of the vehicle.
2. Use the DCM-300 modem to TM-200 Module cable to connect the DCM-300 modem to the Ethernet port on the TM-200 Module. The connector icon for the port on the TM-200 Module is:

CAUTION – Do not mount the DCM-300 modem in direct sunlight or in areas of high heat. This will cause degraded performance.

CAUTION – Wireless, cellular, radio and GNSS signals can interfere with each other. For best performance, mount antennas at least 1 meter away from each other.

Guidance systems

In this chapter:

Autopilot system	52
Trimble Ready install	53
After-market install	54
After-market ACGO install	55
After-market install for Krone harvesters	57
Factory-ready CNH vehicle install	58
Classic Autopilot	59
Challenger MT Tracked 700 / 800	61
TrueGuide system	62
TrueTracker system	64
EZ-Pilot system	66
After-market install	66
OEM install	68
EZ-Steer system, aftermarket	70

This section covers the automatic guidance systems that can be used with the TMX-2050 display:

- Autopilot™ automated steering system (including the Trimble Ready® configuration)
- EZ-Pilot® steering system
- EZ-Steer® assisted steering system
- TrueGuide™ implement guidance system
- TrueTracker™ implement steering system

Use Trimble cables only. Trimble cables use specific wire gauges not found in some off-the-shelf RJ45/CAT 6 cables.

Autopilot system

How you connect the Autopilot automated steering system to your vehicle will differ, depending on the configuration of the vehicle:

- [Trimble Ready install, page 53](#)
- [After-market install, page 54](#)
- [After-market ACGO install, page 55](#)
- [After-market install for Krone harvesters, page 57](#)
- [Factory-ready CNH vehicle install, page 58](#)
- [Classic Autopilot](#)
- [Challenger MT Tracked 700 / 800](#)

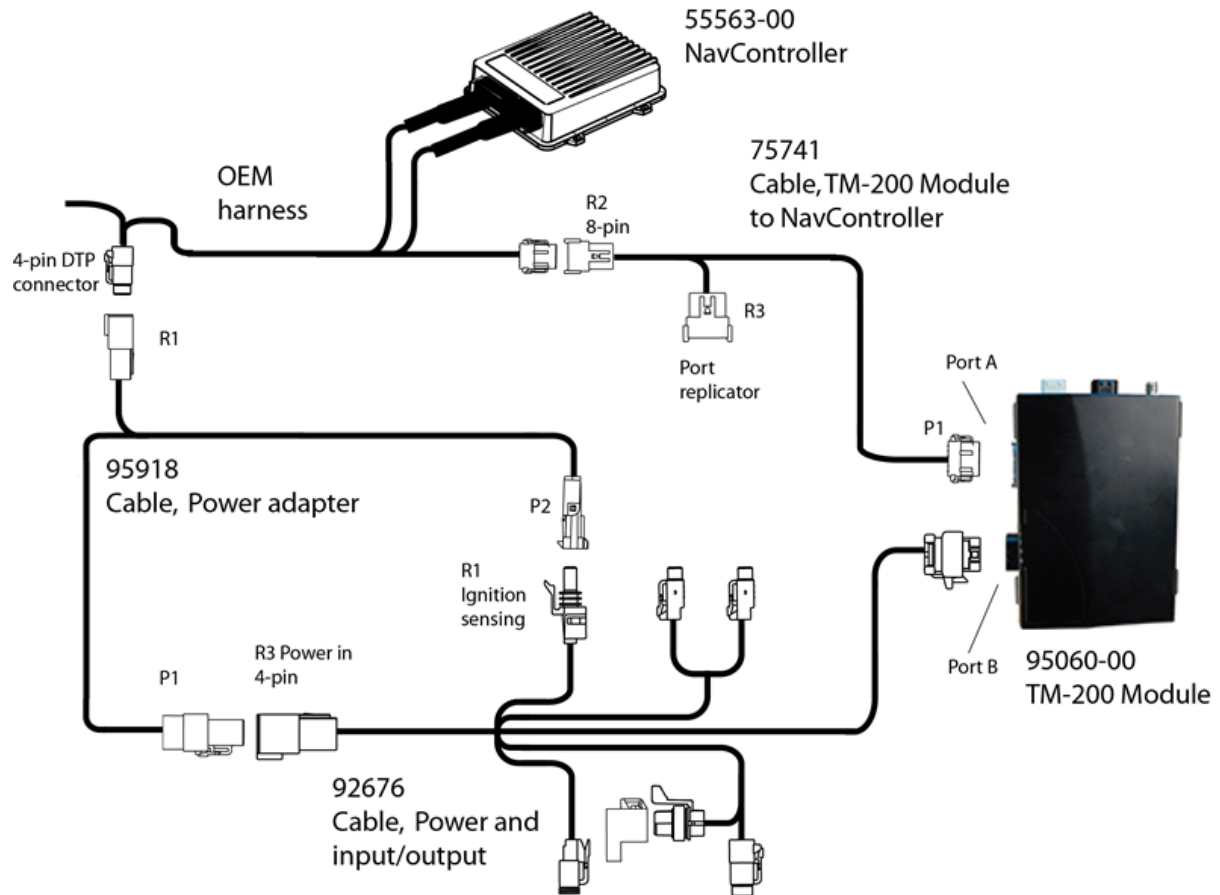

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

CAUTION – Connecting the Port Replicator of the NavController cable to the P4 or P12 connector of the NavController harness will result in damage to the equipment, and will void the warranty.

Trimble Ready install

Trimble Ready® vehicles connect the OEM harness from the NavController to the power adapter cable.

Part Number	Description
55563-00	NavController
75741	TM-200 Module to NavController cable with port replicator
92676	TM-200 Module power and I/O cable connected to port B
95060-00	TM-200 Module
95918	Power adapter cable

After-market install

This graphic shows how to connect the TM-200 Module and the Autopilot system for after-market installations.

Part Number	Description
54601	Main NavController cable
54602	Cable, NavController diagnostic
55563-00	NavController II
67095	2-pin DTM to 2-pin DT power adapter cable

TrueTracker system

The Trimble TrueTracker™ system, the implement receives separate guidance and steering to increase accuracy. Implement steering actively steers the implement being towed by the vehicle. This prevents the implement from pulling to one side (called implement draft):

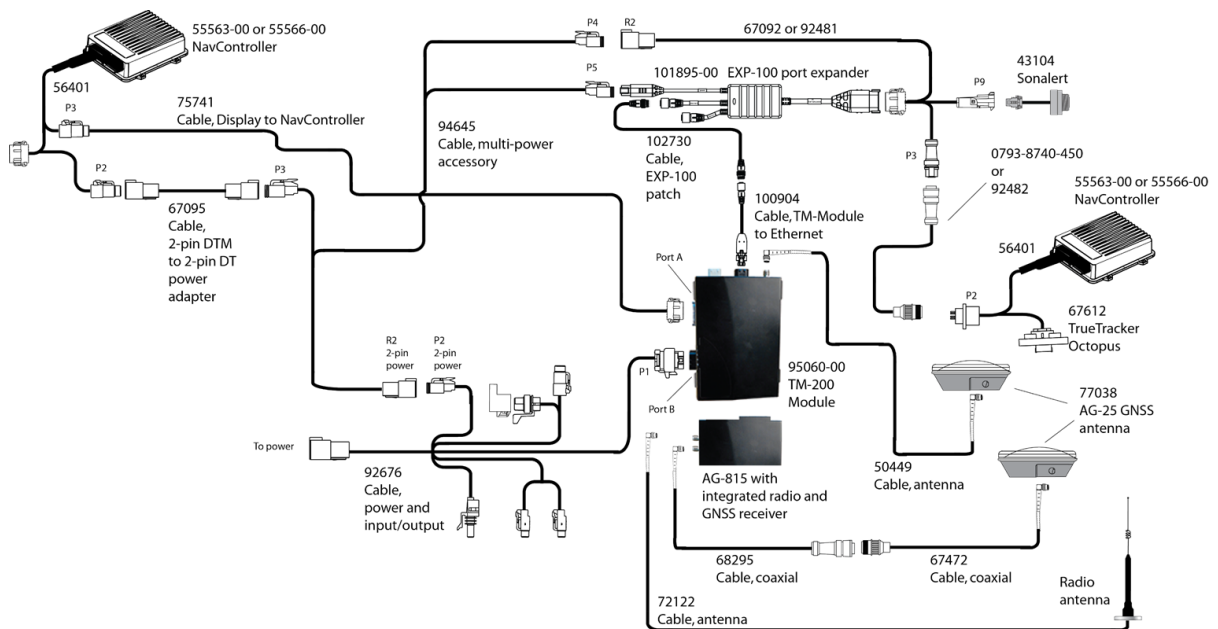

- On extremely sloped ground
- In variable soil conditions
- On curved guidance patterns

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

CAUTION – Connecting the Port Replicator of the NavController cable to the P4 or P12 connector of the NavController harness will result in damage to the equipment, and will void the warranty.

Note – For installation of the TrueTracker joystick with manual steering, see the document 92405-06-E05.

EZ-Pilot system

The connection for the EZ-Pilot steering system to your vehicle will differ, depending on whether it is an after-market install or an OEM install.

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

After-market install

The following graphic shows how perform an after-market install to connect the TM-200 Module with the EZ-Pilot system.

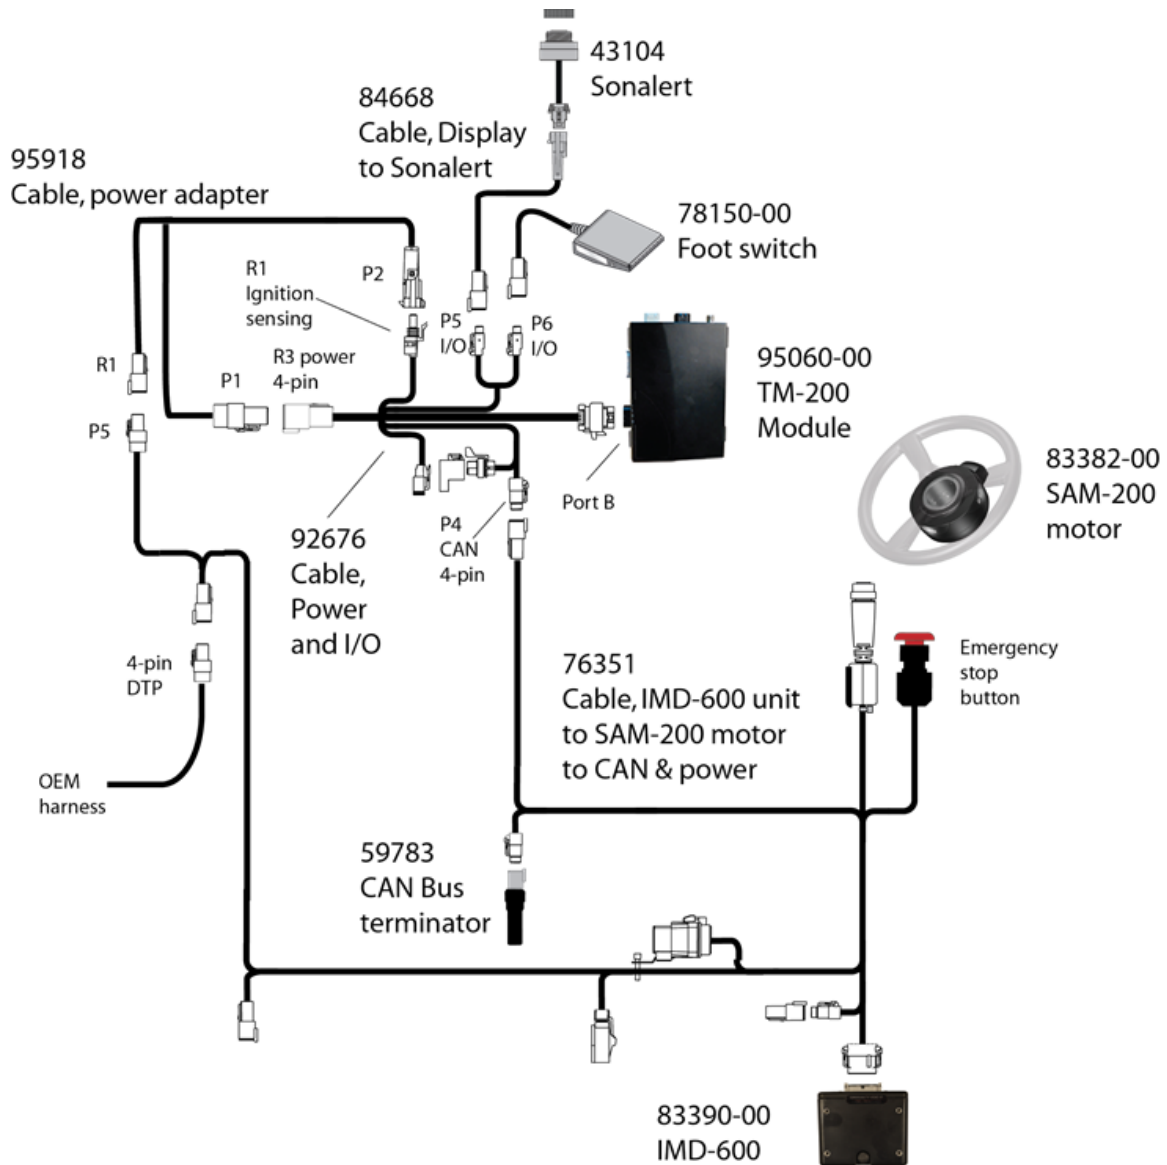

Part Number	Description
43104	Sonalert

Field-IQ system

In this chapter:

Field-IQ cab kit, Rate and Section Control	74
Field-IQ Rate & Section Control with guidance	78
Field-IQ Rate & Section Control / Sprayer full platform kit	84
Boom Height Control with Rate and Section Control	86
Field-IQ system Section Control and Raven rate Control	88
CaselH SPX sprayers (2009 and later), Rate and Section Control	92
Seed Monitoring	95

This chapter shows the cabling for connecting TM-200 Module to the Field-IQ™ crop input control system for various configurations.

Use Trimble cables only. Trimble cables use specific wire gauges not found in some off-the-shelf RJ45/CAT 6 cables.

Field-IQ cab kit, Rate and Section Control

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

Without power relay

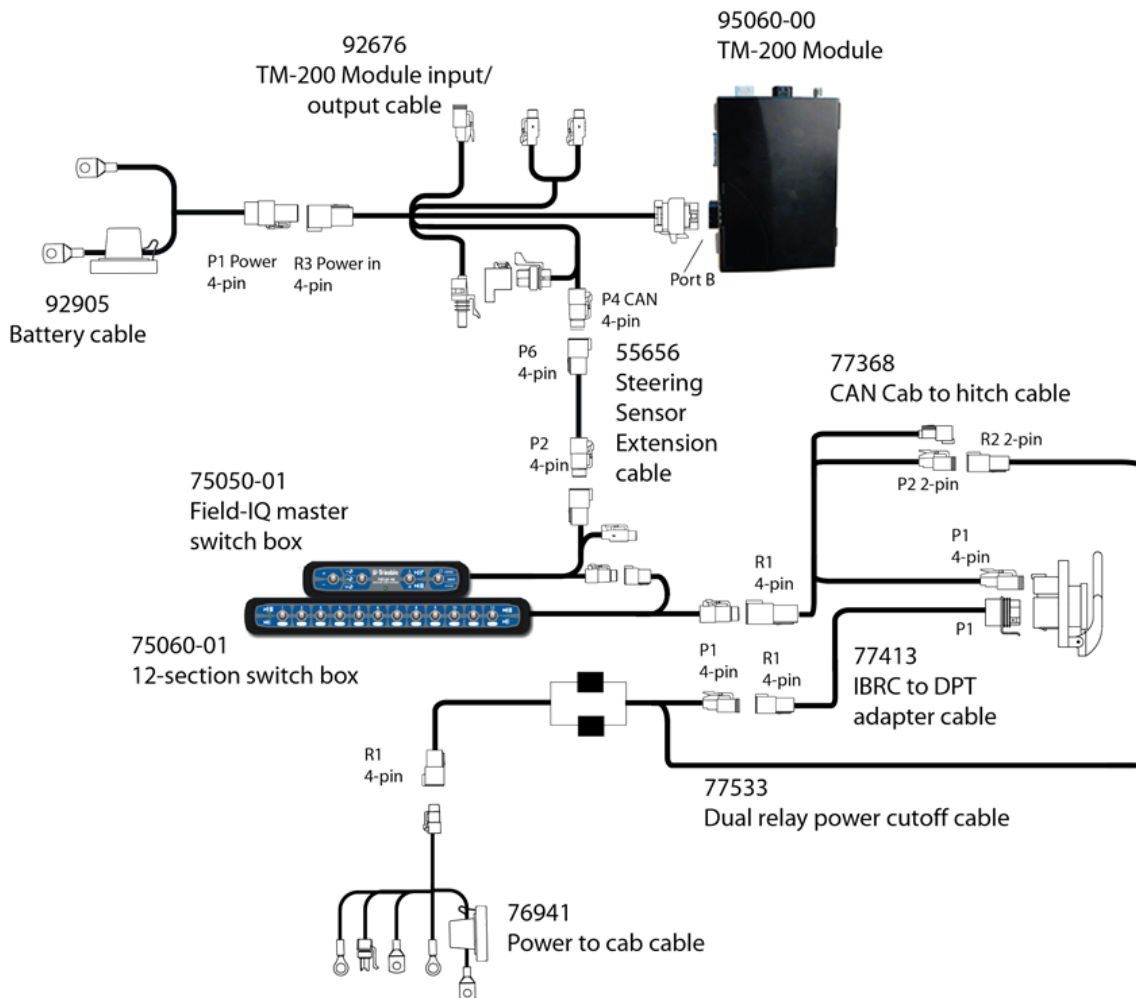

The following shows how to configure the Field-IQ system cab kit for Rate and Section Control.

Part Number	Description
75050-01	Field-IQ system master switch box
75060-01	12-section switch box
75834	Display to Field-IQ system cable
76491	Field-IQ system power cable
77368	Cab to hitch CAN cable
77413	IBRC to DPT adapter cable
92676	Power and I/O cable
95060-00	TM-200 Module

With power relay

The following shows how to configure the Field-IQ cab kit for Rate and Section Control with a power relay.

Part Number	Description
55656	Steering sensor extension cable
75050-01	Field-IQ system master switch box
75060-01	12-section switch box
75834	Display to Field-IQ system cable
76491	Field-IQ system power cable

Part Number	Description
77368	Cab to hitch CAN cable
77413	IBRC to DPT adapter cable
77533	Dual relay power cutoff cable
92676	Power and I/O cable
92905	Battery cable
95060-00	TM-200 Module

Field-IQ Rate & Section Control with guidance

The following diagrams show how to connect the TM-200 Module with Field-IQ system Rate and Section control and:

- [Autopilot system with Rate and Section Control, page 79](#)
- [EZ-Pilot system with Rate and Section Control, page 80](#)
- [EZ-Steer system with Rate and Section Control, page 82](#)

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

Autopilot system with Rate and Section Control

To see the Autopilot configuration, see [Autopilot system, page 52](#).

Part Number	Description
75050-01	Field-IQ master switch box
75060-01	Field-IQ 12-section switch box, optional
76941	Field-IQ power cable
77413	IRBC to DPT adapter
78150	Foot switch
92676	TM-200 Module power and I/O cable connected to port B
95060-00	TM-200 Module

EZ-Pilot system with Rate and Section Control

Field-IQ Rate and Section Control cab kit for the EZ-Pilot system requires the Field-IQ master switch box . Optionally, the 12-switch box may also be used.

Part Number	Description
43104	Sonalert
55656	Steering Sensor Extension cable and Field-IQ Switch Box Extension
59783	CAN bus terminator
59783	CAN bus terminator
75050-01	Field-IQ master switch box
75060-01	12-section switch box (optional)
75834	TM-200 Module to Field-IQ cable

Part Number	Description
76351	IMD-600 unit to SAM-200 motor to CAN and power
78150-00	Foot switch
83382-00	SAM-200 motor
83390-00	IMD-600
84668	Display to Sonalert cable
92676	Power and I/O cable
92905	Battery cable
95060-00	TM-200 Module

EZ-Steer system with Rate and Section Control

Field-IQ Rate and Section Control cab kit for the EZ-Steer system requires the Field-IQ master switch box . The 12-switch box may also be used.

Part Number	Description
53058-00	EZ-Steer motor

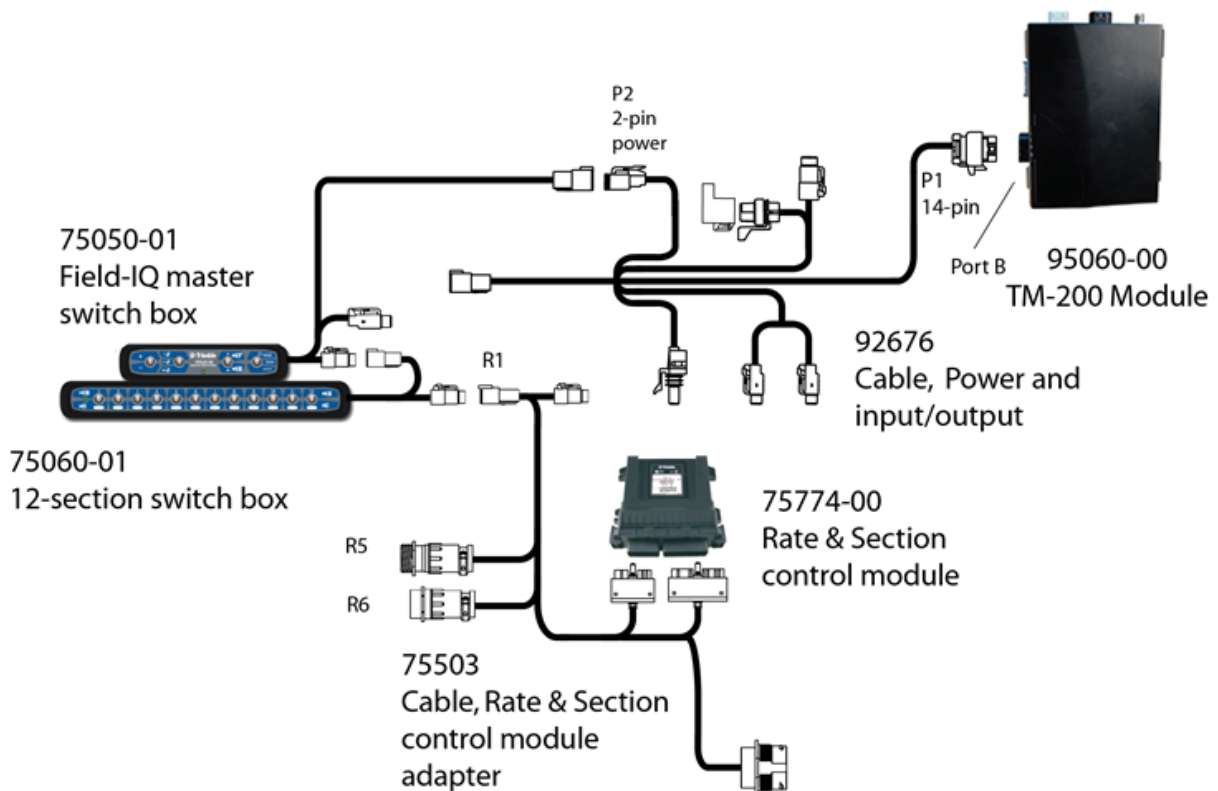

Part Number	Description
53348-10	EZ-Steer controller
62257	EZ-Steer motor
75050-01	Field-IQ master switch box
75060-01	12-section switch box (optional)
75742	EZ-Steer cable
92676	TM-200 Module power and I/O cable connected to port B
92905	Battery cable
95060-00	TM-200 Module

Field-IQ Rate & Section Control / Sprayer full platform kit

The following graphic shows how to connect the TM-200 Module to the Field-IQ Rate and Section Control system and sprayers.

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

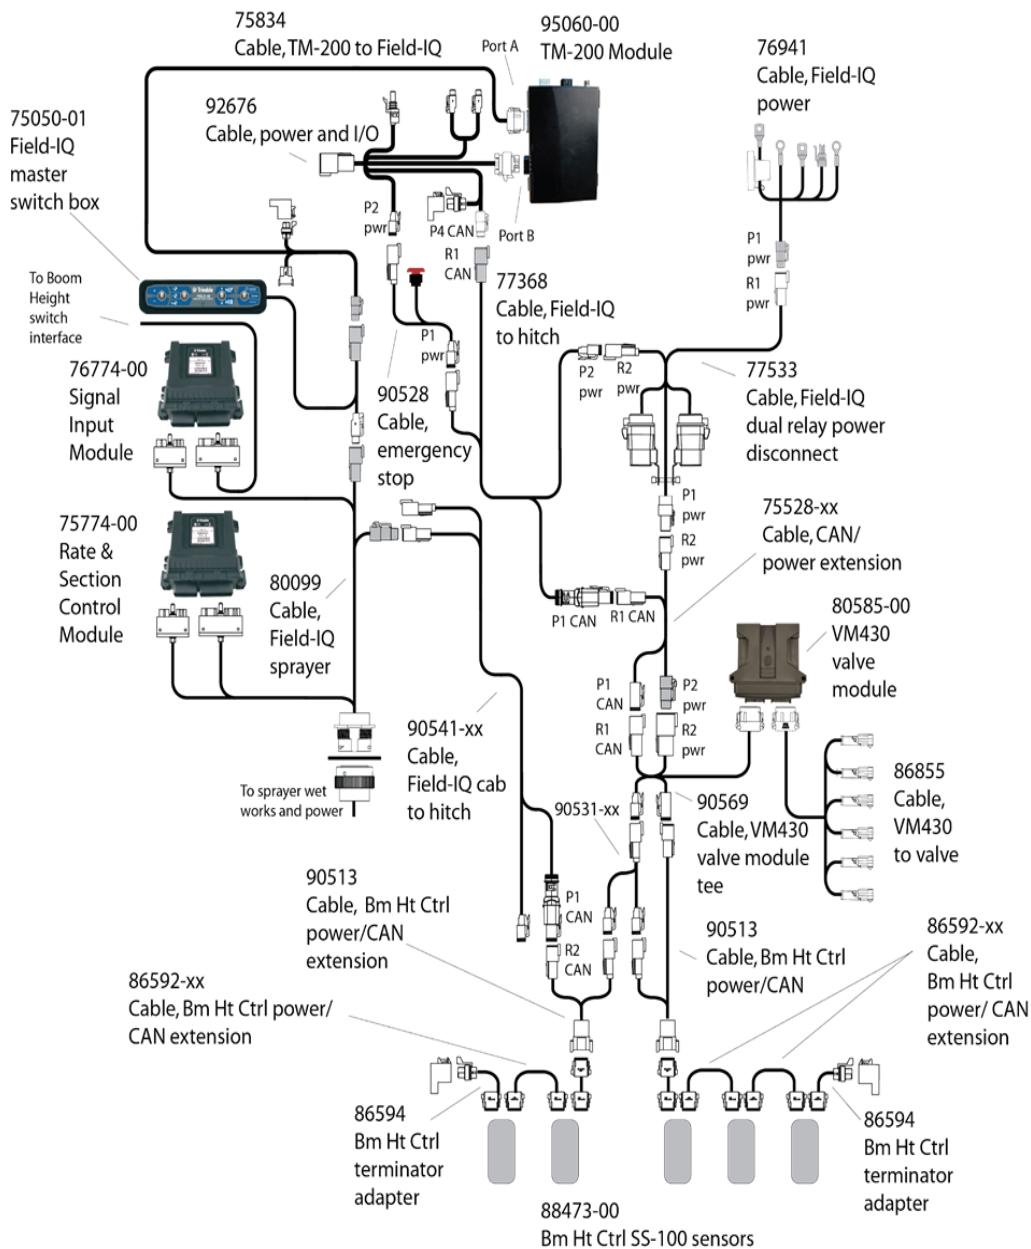

Part Number	Description
55656	Steering Sensor Extension cable and Field-IQ Switch Box Extension
75051-01	Field-IQ system master switch box
75060-01	12-section switch box
75503	Rate and Section Control module adapter cable

Part Number	Description
75774-00	Rate & Section control module
92676	Cable, TM-200 Module power and input/output
95060-00	TM-200 Module
Part Number	Description

Part Number	Description
55656	Steering Sensor Extension cable and Field-IQ Switch Box Extension
75051-01	Field-IQ system master switch box
75060-01	12-section switch box
75503	Rate and Section Control module adapter cable
75774-00	Rate & Section control module
75834	TM-200 Module to Field-IQ cable
95060-00	TM-200 Module

Boom Height Control with Rate and Section Control

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

Part Number	Description
75050-01	Field-IQ system master switch box
75528-xx	Field-IQ system CAN/power extension
75774-00	Rate and section control module
75834	TM-200 Module to Field-IQ cable
76774-00	Signal Input Module - SIM
76941	Field-IQ system power cable
77368	Field-IQ system cab to hitch cable
77533	Field-IQ system dual relay power disconnect cable
80099	Field-IQ sprayer cab cable
80585-00	VM430 valve module
86592-xx	Boom Height Control power / CAN extension cable
86594	Boom Height Control terminator adaptor
86855	VM430 to valve cable
88473-00	Boom Height Control SS-100 sensor
90513	Boom height control power Y cable
90528	Emergency stop cable
90541-xx	Field-IQ system cab to hitch cable
90569	VM430 valve module tee cable
92676	TM-200 Module power and I/O cable connected to port B
95060-00	TM-200 Module

Field-IQ system Section Control and Raven rate Control

The following diagrams show how to connect the TM-200 Module to the Field-IQ section control system and the:

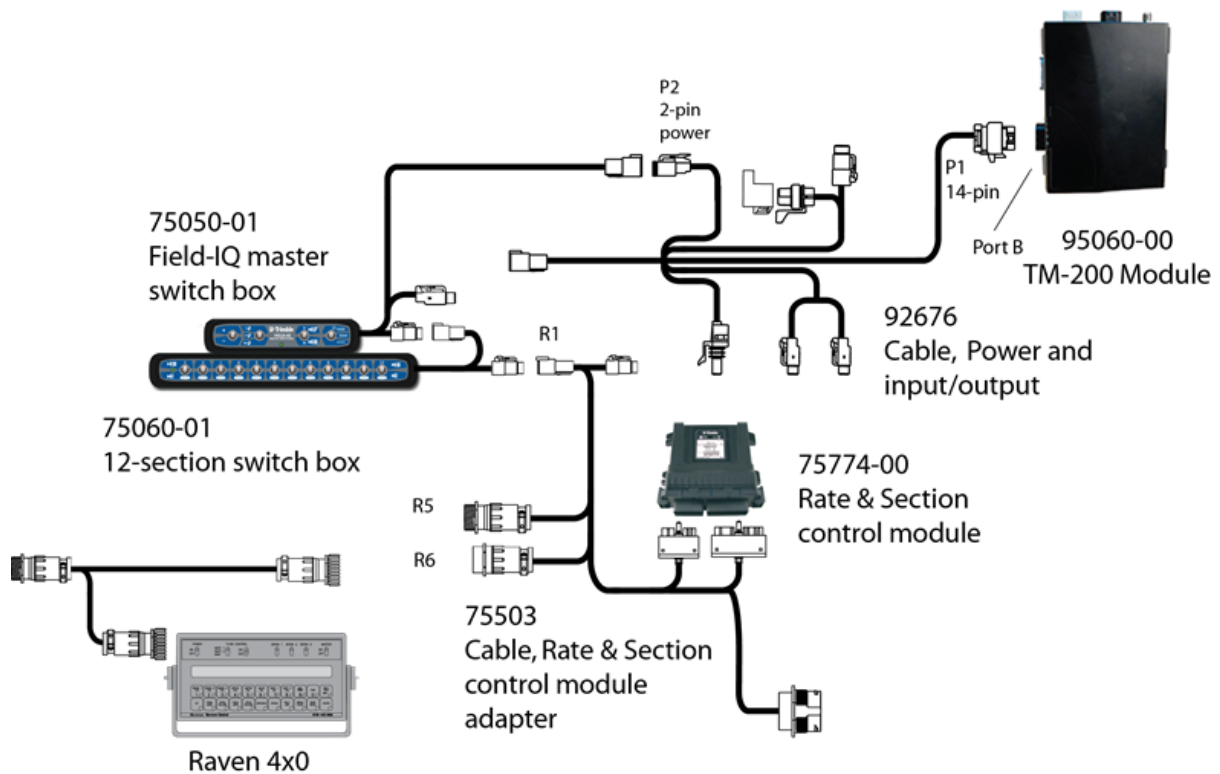

- [Raven 4x0 rate control, page 88](#)
- [Raven 4x00 rate control, page 90](#)

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

Raven 4x0 rate control

The following graphic shows how to connect the TM-200 Module to the Field-IQ section control system with the Raven 4x0 controller.

Part Number	Description
75050-01	Field-IQ system master switch box
75060-01	12-section switch box (optional)
75503	Rate and section control module adapter cable
75774-00	Rate and Section Control module
92676	Cable, TM-200 Module power and input/output
95060-00	TM-200 Module

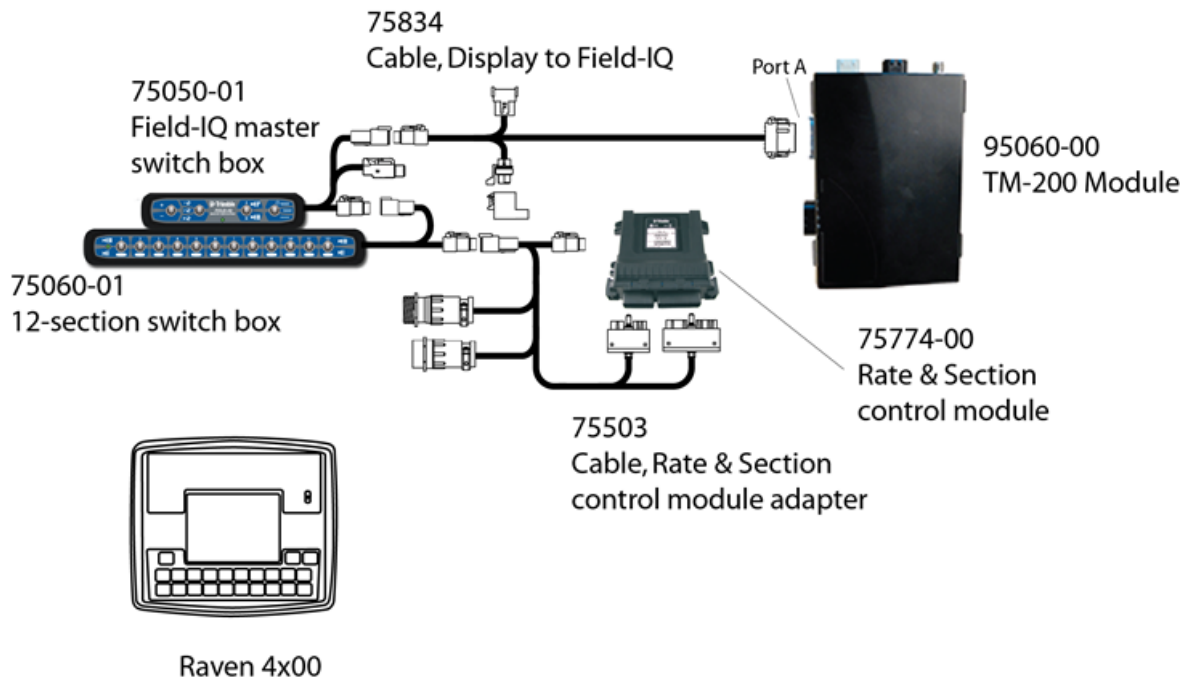

Part Number	Description
75050-01	Field-IQ system master switch box
75060-01	12-section switch box (optional)
75503	Rate and section control module adapter cable
75774-00	Rate and Section Control module
75834	TM-200 Module (port A) to Field-IQ system cable
95060-00	TM-200 Module

Raven 4x00 rate control

The following graphic shows how to connect the TM-200 Module to the Field-IQ Section Control system with the Raven 4x00.

Part Number	Description
75050-01	Field-IQ system master switch box
75060-01	12-section switch box (optional)
75503	Rate and section control module adapter cable
75774-00	Rate and Section Control module
75834	TM-200 Module (port A) to Field-IQ cable
95060-00	TM-200 Module

Part Number	Description
75050-01	Field-IQ system master switch box
75060-01	12-section switch box (optional)
75503	Rate and section control module adapter cable
75774-00	Rate and Section Control module
75834	TM-200 Module (port A) to Field-IQ cable
95060-00	TM-200 Module

CaseIH SPX sprayers (2009 and later), Rate and Section Control

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

Part Number	Description
75050-01	Field-IQ system master switch box

Part Number	Description
75060-01	12-section switch box (optional)
75503	Rate and section control module adapter cable
75774-00	Rate and Section Control module
75834	TM-200 Module (port A) to Field-IQ cable
80250	Field-IQ SPX chassis harness cable (2009 and later)
80254	Field-IQ SPX switch input cable (2009 and later)
92676	Cable, TM-200 Module power and input/output
95060-00	TM-200 Module

Part Number	Description
75050-01	Field-IQ system master switch box
75060-01	12-section switch box (optional)
75503	Rate and section control module adapter cable
75774-00	Rate and Section Control module
75834	TM-200 Module (port A) to Field-IQ cable
80250	Field-IQ SPX chassis harness cable (2009 and later)

Part Number	Description
80254	Field-IQ SPX switch input cable (2009 and later)
95060-00	TM-200 Module

Seed Monitoring

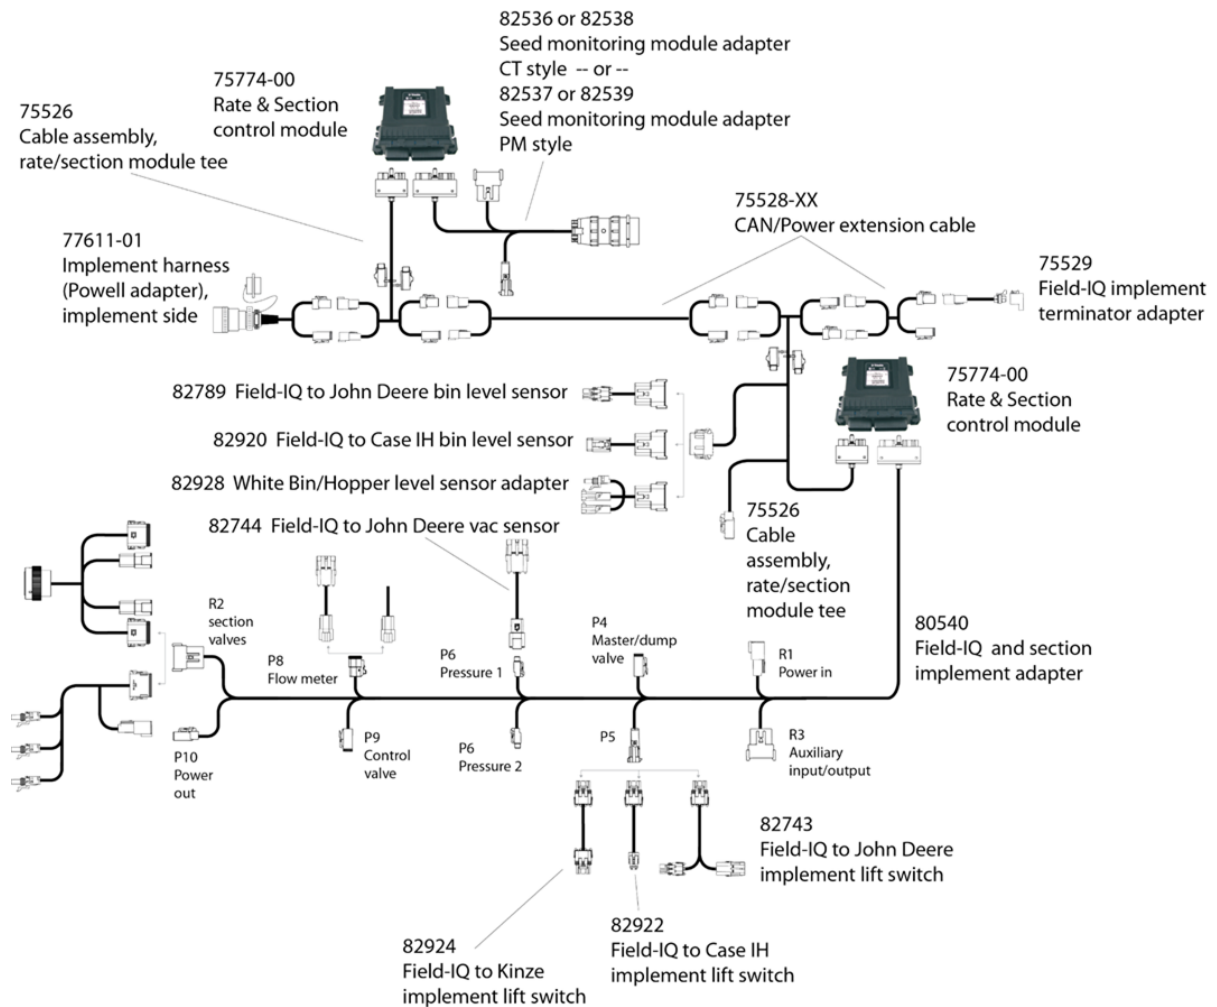

CAUTION – If the vehicle has a master electrical disconnect, make sure the power cable ground connections are not directly attached to the battery terminal. Attach the ground connections of the power cable to the chassis side of the main disconnect so that it is as close as possible to the battery, but still gets disconnected when the master disconnect is turned off. Failure to connect the power cable ground will cause damage to the display. For more information, see [Master disconnect, page 30](#).

Seed Monitoring Only

Part Number	Description
75526	Rate and section control module tee, cable assembly
75774-00	Rate and Section Control module
77611-01	Implement harness, Powell adapter, implement side
82536 / 82538	Seed monitoring module adapter, CT style
82537 / 82539	Seed monitoring module adapter, PM style

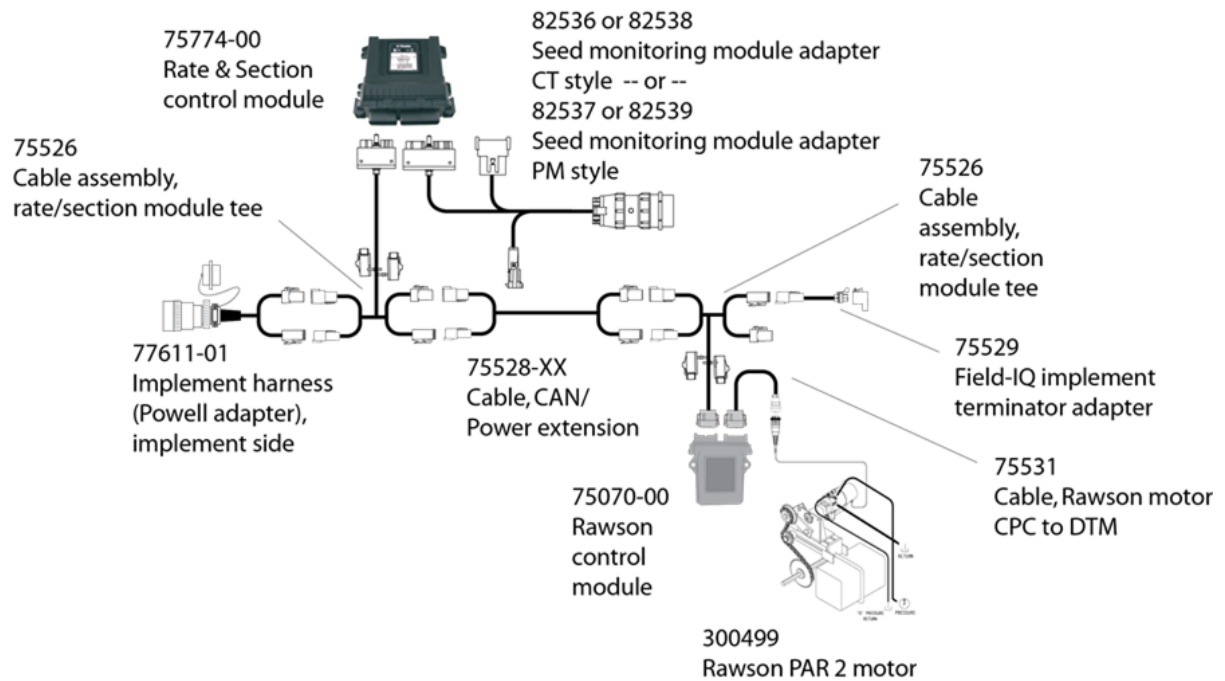

Seed Monitoring with Rate & Section Control

Part Number	Description
75526	Rate/Section module tee cable assembly
75528-xx	CAN/power extension cable
75529	Field-IQ implement terminator adapter
75529	Field-IQ implement terminator adapter
75774-00	Rate and Section Control module
77611-01	Implement harness (Powell adapter), implement side
80540	Field-IQ and section implement adapter

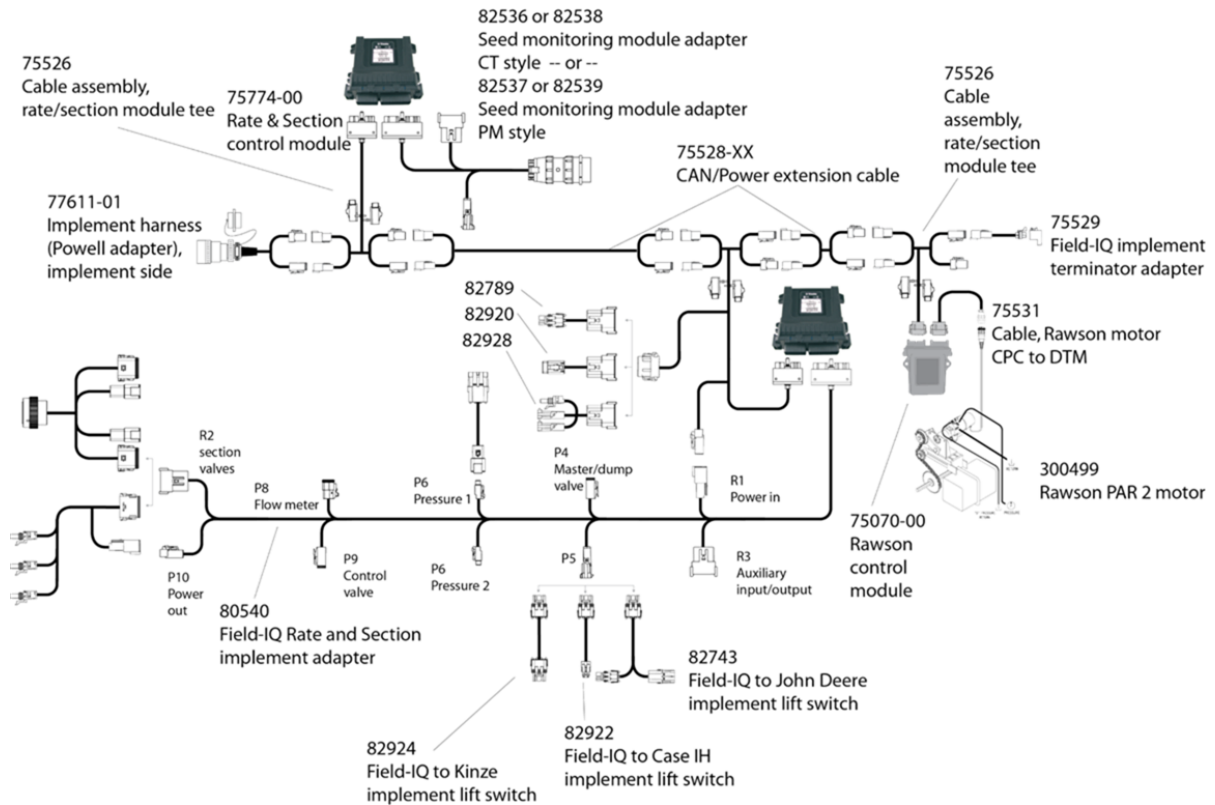

Part Number	Description
82536 / 82538	Seed monitoring module adapter, CT style
82537 / 82539	Seed monitoring module adapter, PM style
82743	Field-IQ system to John Deere implement lift switch
82744	Field-IQ system to John Deere vac sensor
82879	Field-IQ system to John Deere bin level sensor
82920	Field-IQ system to Case IH bin level sensor
82922	Field-IQ system to Case IH implement lift switch
82924	Field-IQ system to Kinze implement lift switch
82928	White bin/hopper level sensor adapter

Rawson Par 2 Seeding with Rate and Section Control

Part Number	Description
75050-00	Rawson control module
75526	Rate/Section module tee cable assembly
75528-xx	CAN/power extension cable
75529	Field-IQ implement terminator adapter
75531	Cable, Rawson motor CPC to DTM
75774-00	Rate and Section Control module
77611-01	Implement harness (Powell adapter), implement side
82536 / 82538	Seed monitoring module adapter, CT style
82537 / 82539	Seed monitoring module adapter, PM style
300499	Rawson PAR 2 motor

Rawson Par 2 seeding and Row Section Control

Part Number	Description
75050-00	Rawson control module
75526	Rate/Section module tee cable assembly
75528-xx	CAN/power extension cable
75529	Field-IQ implement terminator adapter
75531	Cable, Rawson motor CPC to DTM
75774-00	Rate and Section Control module
77611-01	Implement harness (Powell adapter), implement side
80540	Field-IQ Rate and Section implement adapter
82536 / 82538	Seed monitoring module adapter, CT style
82537 / 82539	Seed monitoring module adapter, PM style

Part Number	Description
82743	Field-IQ to John Deere implement lift switch
82789	Cable Assembly, Field-IQ To John Deere Bin Level Sensor
82920	Cable Assembly,Field-IQ to Case IH Bin Level Sensor
82924	Field-IQ to Kinze implement lift switch
82928	Cable Assembly, Field IQ to Dickey John Bin Level Sensor
300499	Rawson PAR 2 motor

Serial variable rate and radar output

In this chapter:

Hardi 5500	102
Raven SCS400 or SCS600 series	104
Rawson drive module	106
Third-party controllers	108

This section covers connections for serial variable rate and radar output, including the Rawson™ drive module.

Use Trimble cables only. Trimble cables use specific wire gauges not found in some off-the-shelf RJ45/CAT 6 cables.

Hardi 5500

This graphic indicates the connections for the Hardi 5500 controller with serial variable rate and radar output.

Note – Radar output is not available with the EZ-Pilot system.

Part Number	Description
59043	Cable, DB9 to DB9
67091	Cable, display to DE9 RS232
92676	Cable, TM-200 Module power and input/output
95060-00	TM-200 Module
100904	Cable, EXP-100 TM-200 Module to Ethernet

Part Number	Description
101895-00	EXP-100 port expander
102730	Cable, EXP-100 patch 1 meter

Raven SCS400 or SCS600 series

This graphic indicates the connections for Raven with serial variable rate and radar output.

Note – Radar output is not available with the EZ-Pilot system.

Part Number	Description
59043	Cable, DB9 to DB9
67091	Cable, display to DE9 RS232
69729	Cable, display to Raven VR adapter
92676	Cable, TM-200 Module power and input/output
95060-00	TM-200 Module

Part Number	Description
100904	Cable, EXP-100 TM-200 Module to Ethernet
101895-00	EXP-100 port expander
102730	Cable, EXP-100 patch 1 meter

Rawson drive module

This graphic indicates the connections for the Rawson™ drive module with serial variable rate and radar output.

Note – Radar output is not available with the EZ-Pilot system.

Part Number	Description
64273	Cable, radar
67091	Cable, display to DE9 RS232
69730	Cable, display to Rawson VR adapter
92676	Cable, TM-200 Module power and input/output

Part Number	Description
95060-00	TM-200 Module
100904	Cable, EXP-100 TM-200 Module to Ethernet
101895-00	EXP-100 port expander
102730	Cable, EXP-100 patch 1 meter

Third-party controllers

This graphic indicates the connections for third-party controllers with serial variable rate and radar output.

Note – Radar output is not available with the EZ-Pilot system.

Part Number	Description
64272	Cable, radar for Raven
64273	Cable, radar for Dickey-john

Part Number	Description
67091	Cable, display to DE9 RS232
92676	Cable, TM-200 Module power and input/output
95060-00	TM-200 Module
100904	Cable, EXP-100 TM-200 Module to Ethernet
101895-00	EXP-100 port expander
102730	Cable, EXP-100 patch 1 meter

ISOBUS

In this chapter:

Full harness	112
In cab	114

This section shows how to connect ISOBUS to the TMX-2050 display.

Use Trimble cables only. Trimble cables use specific wire gauges not found in some off-the-shelf RJ45/CAT 6 cables.

Full harness

The following cables are included in ISOBUS harness kit P/N 89285-00:

- 77368, CAN cab-to-hitch cable
- 77413, IBRC-to-DTP adapter (Powell) cable
- 76941, Power-to-hitch cable
- 75834 (not shown in diagram), can be used to connect ISOBUS full harness to Port A on TM-200 Module

Recommended but not included in 89285-00: 77533, Dual replay power cutoff: Optional. Recommended for cutting power to implement when display is off and to cycle power when restarting display).

Part Number	Description
76941	Cable assembly, power-to-hitch
77368	Cable, CAN cab-to-hitch

Part Number	Description
77413	Cable assembly, Powell quick disconnect (tractor side)
77533	Dual relay power cutoff
92676	Cable, TM-200 Module power and input/output
95060-00	TM-200 Module

In cab

The following cables are included in ISOBUS harness kit P/N 89285-02:

- 75407, TM-200 to ISOBUS in-cab cable
- 92752, ISO in-cab cable
- 95918, Power adapter cable (This cable is not included in the ISOBUS harness kit, but is recommended. This enables you to power on the TM-200 when bus is energized.)

Part Number	Description
75407	Cable, ISOBUS CAN
92676	Cable, TM-200 Module power and input/output

Part Number	Description
92752	Cable, ISO TM-200 in-cab
95060-00	TM-200 Module
95918	TM-200 Module power adapter cable

Water Management

In this chapter:

Dual/Tandem FieldLevel II Classic Autopilot	118
Autopilot with AGCO Challenger MT Wheeled	119
AG VM415	120
VM430	121
IMD-600	123

This chapter shows the cabling for Water Management features:

- FieldLevel™ II
- WM-Drain® farm drainage system

Use Trimble cables only. Trimble cables use specific wire gauges not found in some off-the-shelf RJ45/CAT 6 cables.

Dual/Tandem FieldLevel II Classic Autopilot

Part Number	Description
54608	AgGPS 252 to NavController cable
55563-00	NavController
62039	FieldLevel II system FMD to VM cable
75407	Display to CAN cable
75741	Display to NavController cable
92676	Power and I/O cable
94645	Cable, multi-power accessory
95060	TM-200 Module
95080	AG-815 with GNSS receiver and radio
100904	Cable, EXP-100 TM-200 Module to Ethernet
101895	EXP-100 port expander
102730	1-meter patch cable

This configuration also requires:

- [Dual AG-25 GNSS antenna, page 43](#)

Autopilot with AGCO Challenger MT Wheeled

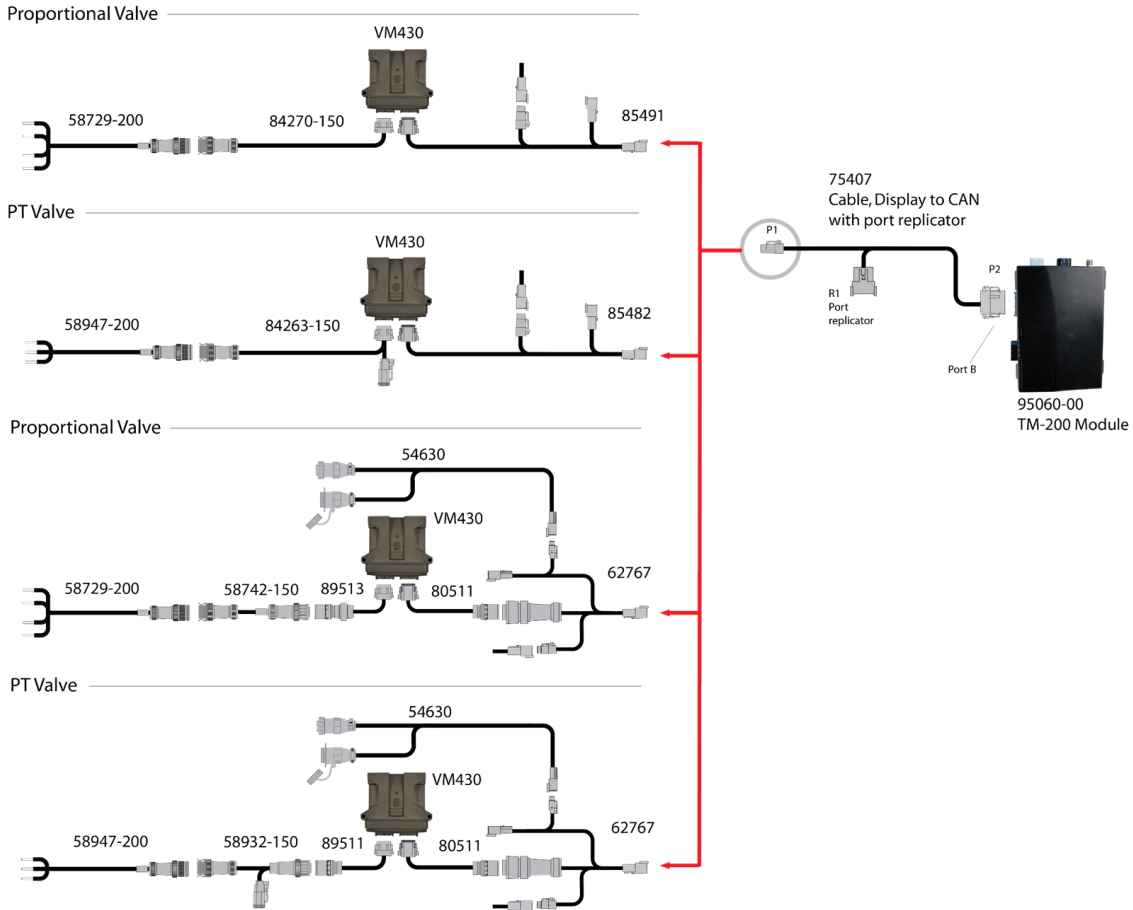

Part Number	Description
54601	Main NavController cable
55563-00	NavController
65602	NavController auxiliary cable
77644	Autopilot to AGCO power and CAN interface cable (incl. with kit 77648)
77646	Power adapter for early Autoguide models (optional) (incl. with kit 77648)
77647	Adapter for early Autoguide models (optional) (incl. with kit 77648)
92676	TM-200 Module power and I/O cable
95060-00	TM-200 Module
95918	Power adapter cable

AG VM415

Part Number	Description
54376-050	CBL VLV VM415 DUAL CASE DIRCT
54630	Cable Assy, Power Supply NC II
62039	Cable, Field Level II, FMD to VM
62108	Cable, Challenger MT CAN Interface - Field Level II
75407	Cable, display to CAN
95060-00	TM-200 Module
AG 0793-1030-120	CABLE, ASSY, WIRING HARNESS, JD
AG 57765-070	CBL VLV VM415 DUAL DEERE DRCT

VM430

Part Number	Description
58729-200	CABLE, GCS300 SGL DANFOSS VALVE QUICK DISCONNECT
58742-150	CABLE, GCS400 DUAL DANFOSS VALVE QUICK DISCONNECT TRACTOR
58932-150	CABLE, GCS400 DUAL PT VALVE, QUICK DISC, TRACTOR
58932-150	CABLE, GCS400 DUAL PT VALVE, QUICK DISC, TRACTOR
58947-200	GCS300 Single PT valve quick disconnect cable
62767	Cable, Field Level II, FMD to VM 410/420
75407	Display to CAN cable with port replicator
80511	Harness - VM420 Adapter, 10 pin MTH , 12 soc Lat
84263-150	CABLE, GCS400 DUAL PT VALVE, QUICK DISC, TRACTOR, VM430

Part Number	Description
84270-150	CABLE, GCS400 DUAL DANFOSS VALVE QUICK DISC, TRACTOR, VM430
85482	Cable, Field Level II, FMX to VM430, PT VALVE
85491	Cable, Field Level II, FMX to VM430, Prop Valve
89511	Harness - VM410 Valve Adapter, 10 Soc Eth, 12 Soc Lat
89513	Harness - VM410 Valve Adapter, 10 Soc Eth, 12 Soc Lat
95060-00	TM-200 Module

IMD-600

The WM-Drain solution using an IMD-600 will require an EXP-100 when running the EZ-Pilot steering system.

Part Number	Description
62039	CAN to VM and FieldLevel II cable
77368	CAN Cab to hitch cable
85789	IMD-600 Adapter
92676	Power and I/O cable
92905	Battery cable
95060-00	TM-200 Module
833901-01	IMD-600

Yield Monitoring

In this chapter:

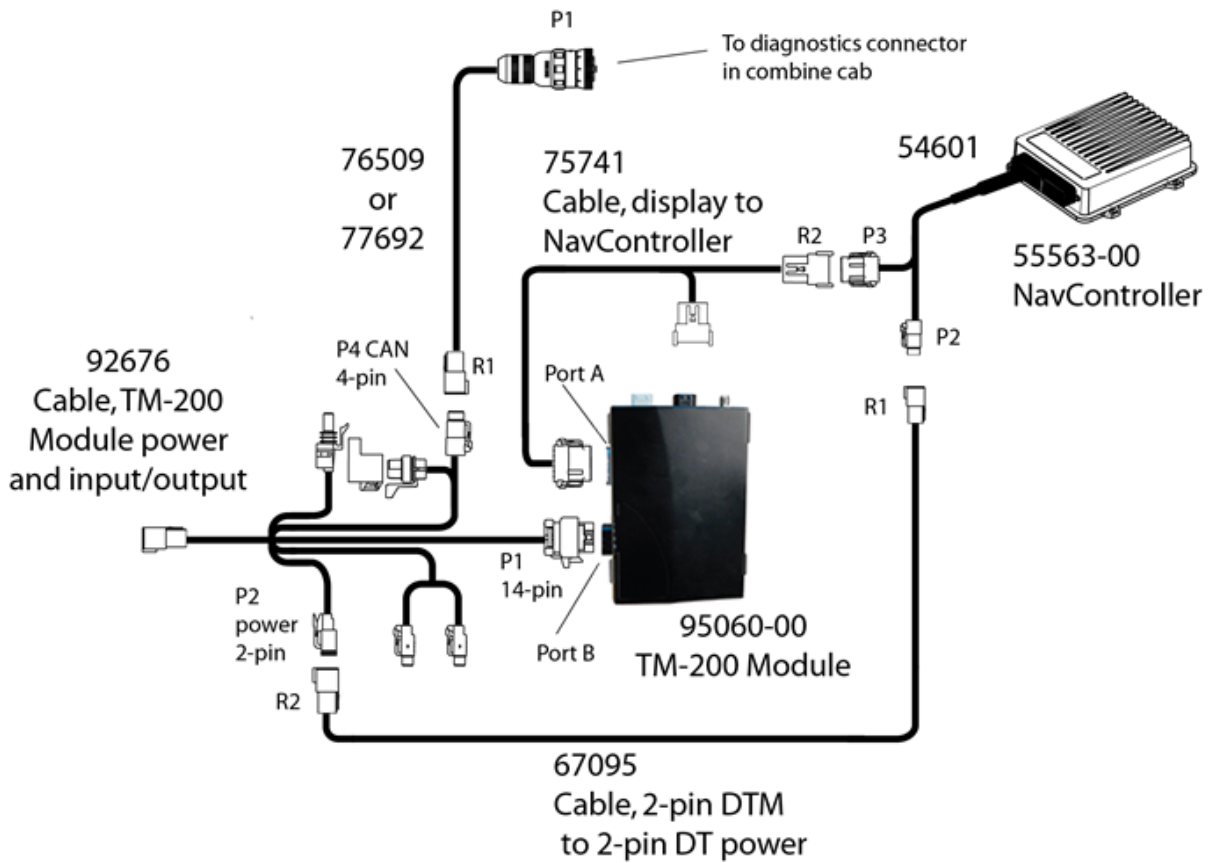

Autopilot and John Deere over CAN126

Yield Monitoring serial data input127

This section covers cabling for Yield Monitoring.

Use Trimble cables only. Trimble cables use specific wire gauges not found in some off-the-shelf RJ45/CAT 6 cables.

Autopilot and John Deere over CAN

Part Number	Description
54601	Cable, NavController main
55563-00	NavController
67095	Cable, 2-pin DTM to 2-pin DT power
76509	Cable, display to John Deere 9x70 or 9x60 non-ATR Ready
77692	Cable, display to John Deere 9x60 ATR Ready
92676	Cable, TM-200 Module power and I/O
95060-00	TM-200 Module
